Re: Application for Appraised Value Limitation on Qualified Property

Dear Dr. Clore,

On behalf of our client, attached is the Application for Appraised Value Limitation on Qualified Property for Apex Midway Wind, LLC ("Apex"). Apex originally applied for and executed an appraised value limitation agreement (No. 329) with Gregory-Portland ISD in December 2013. On July 2, 2015 Apex terminated the agreement by letter to the district because Apex will not be able to make the qualified investment by the end of the qualifying time period on December 31, 2015. That letter is attached for reference.

Apex is now reapplying for the Appraised Value Limitation on Qualified Property and considering a decision to construct the project in 2016. Please note that a final investment decision to construct the project has not been made. As highlighted in Tab 5 of the attached application, the Apex Midway Wind project is competing internally for capital with other Apex projects being developed in Colorado, Oklahoma, and Indiana. The Appraised Value Limitation on Qualified Property is a very important competitive factor for Apex to consider in its decision to build the project in San Patricio County.

Apex appreciates the consideration of Gregory-Portland ISD in accepting this new application and starting the process toward a new agreement with the district.

Sincerely,

D. Dale Cummings

Form 50-296-A

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at www.texasahead.org/tax_programs/chapter313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Description of Project

Apex Clean Energy Holdings, LLC (Apex) is requesting an appraised value limitation from Gregory-Portland Independent School District (ISD) for the Apex Clean Energy Project (the "Project"), a proposed wind powered electric generating facility in San Patricio County. The proposed Gregory-Portland ISD portion of the Project (this application) will be constructed within a reinvestment zone established by San Patricio County Commissioners Court on December 16, 2013.

The proposed Project is anticipated to have a total capacity of 159 MW, with approximately 111 MW located in Gregory-Portland ISD. Turbine selection is ongoing at this time and has not been finalized. The exact number of wind turbines and size of each turbine will vary depending upon the wind turbines selected, manufacturer's availability and prices, ongoing wind studies and the final megawatt generating capacity of the Project when completed. Current plans are to install 3.0 MW Acciona turbines with an estimated 37 turbines located in Gregory-Portland ISD. Portions of the project will be located in Taft ISD and a separate Chapter 313 application is being submitted to that district for their respective portion of the project. The Applicant requests a value limitation for all materials and equipment installed for the Project, including but not limited to; wind turbines, turbine transformers (pad-mounts), towers, foundations, roadways, buildings and offices, anemometer towers, collection system, electrical substations, transmission line and associated towers, and interconnection facilities.

Construction of the Project is anticipated to begin in the first quarter of 2016 with completion by December 31, 2016.

Documentation to assist in determining if limitation is a determining factor.

Apex Clean Energy, Inc. is a leading U.S. - based developer of commercial-scale wind and solar energy facilities in North America. With a team of some of the most experienced renewable energy professionals in the industry, it has built a strong reputation for responsible development and quality projects constructed to the highest industry standards.

Prior to the formation of Apex, the management team had collectively developed, financed, constructed and managed more than \$10 billion in operating renewable energy facilities totaling nearly 10,000 megawatts of capacity. Its people have a proven track record working with communities and landowners to develop state-of-the-art facilities that produce jobs, income to landowners, revenue for local government, and clean sources of domestic energy.

Apex was formed in 2009 by a management team with extensive renewable energy experience. In 2000, the team created Greenlight Energy, Inc. Six years later, they had developed \$750 million of facilities that are now in commercial operations, with a combined generating capacity of 450 MW. Following BP Alternative Energy's acquisition of the company in 2006, the team formed Greenlight Energy Resources to reinvest in the clean energy industry.

In December 2012, Apex completed construction of the 300 MW Canadian Hills Wind project in Oklahoma. Earlier that year, commercial operation of Apex's solar facilities in Colorado commenced. The company is now developing several thousand megawatts of wind and solar projects around the country.

Thanks to a dynamic team of over 70 talented and experienced professionals, Apex has the ability to locate and develop wind farms in numerous locations throughout the United States.

Apex has leased the land for the Midway project. However, a final investment decision has not been reached and no contracts for the sale of power have been executed.

The decision to invest in a particular country or state depends on the economics of the investment in the particular jurisdiction. In the case of the investment in the proposed project in Texas, the decision will be based on a number of commercial and financial considerations, including the ability to obtain relief regarding local property taxes. Obtaining the Chapter 313 value limitation is a necessary part of the economic analysis for investment in Texas. The power generation market is very

competitive and practically all of Apex's Texas competitors have Chapter 313 value limitation agreements. Without the Chapter 313 value limitation, siting the project in San Patricio County is significantly less attractive.

The Apex Midway Wind project is in direct competition for internal capital expenditures with projects in the following locations:

- Henry and Rush Counties, Indiana
- Beckham County, Oklahoma
- Beaver County, Oklahoma
- Yuma, County, Colorado

Description of how project is located in more than one district, including list of percentage in each district and, if determined to be a single unified project, documentation from the Office of the Governor (if applicable)

All of the project is located in San Patricio County and San Patricio Drainage District. The project is partially in Gregory-Portland ISD and partially in Taft ISD. Below is a table showing the estimated number of megawatts and turbines in each school district (subject to final site decisions).

School District	Gregory-Portland ISD	Taft ISD	Total
Estimated Megawatts	111	48	159
Estimated Number of Turbines	37	16	53

Approximately 70% of the project is located in Gregory-Portland ISD based upon megawatt capacity (111 out of 159 megawatts). Approximately 30% of the project is located in Taft ISD based upon megawatt capacity (48 out of 159 megawatts).

The project is also located 100% in the following tax districts and the tax rate for each district is shown below.

Re: Chapter 313 Job Waiver Request

Dear Dr. Clore,

Apex Midway Wind, LLC requests that the Gregory-Portland Independent School District's Board of Trustees waive the job requirement provision as allowed by Section 313.025(f-1) of the tax code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property owner that is described in the application.

Apex Midway Wind, LLC requests that the Gregory-Portland Independent School District makes such a finding and waive the job creation requirement for 10 permanent jobs. In line with industry standards for job requirements, Apex Midway Wind, LLC has committed to create eight total jobs for the project, five of which will be in Gregory-Portland ISD. Wind projects create a large number of full and part-time, but temporary, jobs during the construction phase of the project, but require a relatively small number of highly skilled technicians to operate and maintain the project after commercial operation commences.

The industry standard for employment is typically one full-time employee for approximately every 10-12 turbines. This number may vary depending on the operations and maintenance requirements of the turbines selected as well as the support and technical assistance offered by the turbine manufacturer. The permanent employees of a wind project maintain and service wind turbines, underground electrical connections, substations and other infrastructure associated with the safe and reliable operation of the project. In addition to the onsite employees, there may be managers or technicians who support the project from offsite locations.

Sincerely,

D. Dale Cummings

If the limitation starts at the end of the qualifying time period or the qualifying time period overlaps the limitation, no investment should be included on this line.
 *** If your qualifying time period will overlap your value limitation period, do not also include investment made during the qualifying time period in years 1 and/or 2 of the value limitation period, depending on the overlap. Only include investments/years that were not captured on Schedule A1.
 For All Columns: List amount invested each year, not cumulative totals. Only include investments in tangible personal property. Only include estimates of investment for "replacement" property if the property is specifically described in the application.
 Column A: This represents the total dollar amount of planned investment in tangible personal property. Only include estimates of investment for "replacement" property if the property is specifically described in the application.

GUIDELINES AND CRITERIA FOR GRANTING TAX ABATEMENT

WHEREAS, the attraction of long-term investment and the establishment of new jobs in the area would enhance the economic base of area taxing entities; and

WHEREAS, San Patricio County must compete with other counties across the nation currently offering tax inducements to attract new plant and modernization projects, and studies have shown that a favorable local tax climate and start-up tax concessions rank second on the list of priorities for new plant installations or expansions; and

WHEREAS, tax abatement is one of the principal means by which the public sector and the private sector can forge a partnership to promote real economic growth within a community; and

WHEREAS, any tax incentives offered must be strictly limited in application to those new and existing industries that bring new wealth to the community in order to avoid reducing the needed tax revenues of area taxing entities; and

WHEREAS, the Property Redevelopment and Tax Abatement Act (The "Act"), Chapter 312 of the Texas Tax Code authorizes counties, cities and school districts to provide property tax abatement for limited periods of time as an inducement for the development or redevelopment of a property; and

WHEREAS, the Act requires eligible taxing jurisdictions to establish Guidelines and Criteria as to eligibility for tax abatement agreements prior to granting any future tax abatement, said Guidelines and Criteria to be unchanged for a two-year period unless amended by a three-fourths vote; and

WHEREAS, to assure a common, coordinated effort to promote economic development, these Guidelines and Criteria have been circulated among San Patricio County and other governmental entities for consideration as a common policy for all jurisdictions which choose to participate in tax abatement agreements;

NOW, THEREFORE, BE IT RESOLVED by the County of San Patricio that these Guidelines and Criteria for granting tax abatement be adopted:

Section 1. Definitions.

(a) "Abatement" means the temporary, full or partial exemption from ad valorem taxes of certain added value to real and personal property in a zone designed for economic development purposes pursuant to the Act.

(b) "Added Value" means the increase in the assessed value of an eligible property as a result of "expansion" or "modernization" of an existing facility or construction of a "new facility." It does not mean or include "deferred maintenance."

- (c) "Agreement" means a contract between a property owner and/or lessee and an Eligible jurisdiction for the purposes of temporary tax abatement.
- (d) "Base Year Value" means the assessed value of eligible property as of the January 1 preceding the execution of an Agreement plus the agreed upon value of eligible property improvements made after January 1 but before the execution of the Agreement.
- (e) "Basic Industrial, Manufacturing or Service Facility" means buildings and structures, including fixed machinery and equipment not elsewhere described, used or to be used for the production of products or services which derive a majority of revenue from points beyond a 50-mile radius of San Patricio County.
- (f) "Deferred Maintenance" means improvements necessary for continued operations which do not improve productivity or alter the process technology.
- (g) "Economic Life" means the number of years a property improvement is expected to be in service in a Facility.
- (h) "Eligible Jurisdiction" means San Patricio County and any municipality or school district, the majority of which is located in San Patricio County, that levies ad valorem taxes upon and provides services to property located within the proposed or existing zone designated pursuant to the Act.
- (i) "Expansion" means the addition of buildings, structures, fixed machinery or equipment for the purposes of increasing capacity.
- (j) "Facility" means property improvements completed or in the process of construction which together compromise an integral whole.
- (k) "Modernization" means the replacement and upgrading of existing facilities which increase the productive input or output, updates the technology or substantially lowers the unit cost of the operation, and extends the economic life of the facilities. Modernization may result from the construction, alteration or installation of buildings, structures, fixed machinery or equipment. It shall not be for the purpose of reconditioning, refurbishing, repairing or completion of deferred maintenance.
- (l) "New Facility" means a property previously undeveloped which is placed into service by means other than or in conjunction with an Expansion or Modernization.
- (m) "Owner" means the owner of a Facility subject to abatement. If the Facility is constructed on a leased property, the owner shall be the party which owns the property subject to tax abatement. The other party to the lease shall join in the execution of Agreement but shall not be obligated to assure performance of the party receiving abatement.

Section 2. Abatement Authorized.

- (a) Authorized Facilities. A Facility may be eligible for abatement if it is a Basic Industrial, Manufacturing or Service Facility. Abatement may be granted for new facilities and

improvements to existing facilities for the purpose of Modernization or Expansion.

(b) Tangible Personal Property. Equipment and/or tools used, or brought or leased for use, in the operations of the business applying for tax abatement, other than that which was located on the real property at any time before the period covered by the tax abatement agreement, and other than inventory, supplies, and/or office equipment.

(c) Creation of New Value. Abatement may only be granted for the additional value of eligible property improvements made subject to and listed in an abatement Agreement between the Eligible jurisdiction and the property owner and lessee (if required), subject to such limitations as said jurisdiction may require. The economic life of the improvements must exceed the term of the abatement Agreement.

(d) Eligible Property. Abatement may be extended to the value of the improvements to real property, including buildings, structures, fixed machinery and equipment, and site improvements, plus that office space and related fixed improvements necessary to the operation and administration of the Facility. Abatements may also extend to tangible personal property that is located within the zone.

(e) Period of Abatement. Abatement shall be granted effective with the January 1 valuation date immediately following the date of execution of the Agreement. Abatement shall be allowed for a period of ten years.

(f) Abatement Percentage. Temporary property tax abatement shall be authorized for the development of a Facility or the addition of tangible personal property that meets either a qualification criteria of capital investment or a qualification criteria based upon a combination of the number of new jobs created plus salary.

(1) The capital investment qualification criteria is as follows:

(4) In order to be counted as a permanent job under these Guidelines, the job must be a full-time position providing regular work schedules of at least 35 hours per week and the employer must cover over 51% of the employee's health insurance costs. Any jobs filled by H1B and H2B workers will be excluded as permanent jobs. As a result, the actual amount of abatement may vary from year to year based upon employment levels and property valuations.

(5) During the period of construction of the Facility, the Owner shall receive an abatement percentage based upon the criteria set forth in the Owner's application for abatement approved by the governing body of the Eligible jurisdiction. The construction period may last up to two years.

- Provide that the governing body may cancel or modify the agreement if the owner fails to comply with the agreement.

Job Creation

Company agrees to create at least 20 permanent full time jobs at the Project and make reasonable efforts to employ persons who are residents of San Patricio County, Texas in such jobs; provided, however, that Company shall not be required to employ San Patricio County residents who are not (i) equally or more qualified than nonresident applicants; (ii) available for employment on terms and/or salaries comparable to those required by nonresident applicants or (iii) able to become qualified with 72 hours of training. In the event a San Patricio County resident could become qualified with a maximum of 72 hours of training, Company shall provide for such training. Each of the persons employed in such jobs shall perform a portion of their work in San Patricio County, Texas

Local Goods and Services

Company and its authorized vendors intend to make reasonable effort to purchase services and supplies from San Patricio County individuals and businesses during the construction of the Facility in San Patricio County, provided that such materials and supplies are of the same quality as those available from non-San Patricio County individuals or businesses and are available at comparable terms. Comparable terms shall mean a price that is less than or equal to 105% of the price of non-San Patricio County individual or businesses. Company will take reasonable steps to employ or have employed residents of San Patricio County, provided that such residents have the required skills and experience and are available at a competitive wage or salary, as applicable. In furtherance of that goal, the following provisions, or a reasonable derivation thereof, will be followed by Company.

Upon the completion of the construction, Company shall leave such public and San Patricio County roads in as close to the condition as they were prior to construction as is practicable, excepting normal wear and tear.

AG-0600

San Patricio County and Owner acknowledge that Texas Attorney General Opinion GA-0600, dated January 29, 2008, arguably may be interpreted to hold that certain provisions of Section 312 of the Texas Tax Code may not authorize a commissioners court to execute a tax abatement agreement for leasehold interests in or improvements on taxable real property, and that said opinion is currently under review and subject to challenge by interested parties. If, during the Term of this Agreement, should this Agreement, as a tax abatement agreement under Section 312 of the Texas Tax Code, or a similar tax abatement agreement wherein San Patricio County granted a tax abatement to the owner/operator of a renewable energy project using wind turbines be declared invalid or unenforceable under Texas law in a non-appealable judicial decision, then to the extent that taxes then previously abated hereunder shall be required by law to be repaid to San Patricio County, all taxes abated hereunder shall be due and payable within ninety (90) days of receipt of written notice/demand.

Viable Presence means (i) the operation of the Facility, as the same may from time to time be expanded, upgraded, improved, modified, and changed, remodeled, repaired, restored, reconstructed, reconfigured, and/or reengineered, over the term of this Agreement, and (ii) the retention over the term of this Agreement of not fewer than twenty (20) Qualifying Jobs to be located and performed within Company's entire project, which includes, but is not limited to, Company's Qualified Property, as set forth in the Application, with the minimum salaries required by Texas Tax Code 313.021 (3)(E). As its sole and exclusive remedy for Company's failure to Maintain a Viable Presence, San Patricio County shall be entitled to cancel this Agreement pursuant to the provisions hereof and to recapture property tax revenue abated as a result of this Agreement, subject to the provisions hereof regarding notice and Company's right to cure.
