TAB 4**Detailed Description of the Project**

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Detailed Description of Project

The Rattlesnake Wind Project ("Rattlesnake" or the "Project") is a proposed wind energy generation project located in McCulloch County Texas. The Project is anticipated to consist of 64 wind turbines which when operational will be capable of generating 160 MW. Additional Project facilities will include a Project Operations and Maintenance Facility, a main project substation, and a 16 mile transmission line to connect the project to the existing electrical grid. The Project is situated on an uprising known as the Brady Mountains. The ridgeline runs predominantly east-west which runs perpendicular to the prevailing wind direction. The Project area is comprised almost entirely of rangeland (>90 %), utilized for grazing, hunting and off-road recreation and is well suited for a wind farm. The project will be located on approximately 12,000 acres of private land which has been leased under a 30 year wind lease. The project is planned to be interconnected to LCRA's 345kV system located approximately 15 miles north of the Project. Private easements have been obtained for the transmission line connecting the project to LCRA's existing system.

The proposed project will include but is not limited to the following:

- 64 turbines, 52 of which will be located in Brady ISD
- There will be underground and potentially overhead medium voltage electric cabling connecting the turbines to the project substation.
- The project will be connected by a series of private gravel roads
- The project will require a 345kV substation, this substation will be located in Brady ISD
- The project will have a 345kV high-voltage transmission line which will be approximately 16 miles long, this transmission line will be located in Brady ISD
- The project will have a single Operations & Maintenance Building which will house spare parts, have mechanics bays and about 2000 sq ft of office space. This O&M building will be located in Brady ISD

- The project will have meteorological equipment to measure weather conditions and wind speeds final location of measurement tower(s) will depend on the final turbine selection and project finance requirements

Full construction of the Project is anticipated to begin in the 1st Quarter of 2017 with completion by December 31, 2017.

**NOTE:* The map in TAB 11 shows the potential locations of the 52 wind turbines within Brady ISD boundaries; however, the final number of turbines and the location of each of these facilities is dependent upon ongoing negotiations with power purchasers and other factors.
