# Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

Economic Development  
and Analysis  
**Form 50-296-A**

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
  - the date on which the school district received the application;
  - the date the school district determined that the application was complete;
  - the date the school board decided to consider the application; and
  - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at [www.texasahead.org/tax\\_programs/chapter313/](http://www.texasahead.org/tax_programs/chapter313/). **TAB 4**

Detailed Description of the Project

*Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.*

Bluebell Solar, LLC (Bluebell) is requesting an appraised value limitation from Sterling City Independent School District (ISD) for the Bluebell Solar Project (the "Project"), a proposed solar powered electric generating facility in Sterling County. The proposed Sterling City ISD Project (this application) will be constructed within a Reinvestment Zone that will be created by Sterling County by end of March 2016. A map showing the location of the project is included in Tab 11.

The proposed Project is anticipated to have a total capacity of up to 173 MW, all of which is located in Sterling City ISD. Solar equipment selection is ongoing at this time and has not been finalized. The exact number of PV panels and their capacity will vary depending upon the panels and inverters selected, manufacturer's availability and prices, ongoing engineering design optimization and the final megawatt generating capacity of the Project when completed. Current plans are to install 769,000 Yingli Solar or other high quality Chinese manufactured PV panels and 44x4 MW GE inverters within Sterling City ISD. The Applicant requests a value limitation for all materials and equipment installed for the Project, including but not limited to; solar modules/panels, racking and mounting structures, inverters boxes, combiner boxes, meteorological equipment, foundations, roadways, buildings and offices, paving, fencing, collection system, electrical substations, generation transmission tie line and associated towers, and interconnection facilities.

Construction of the Project is anticipated to begin in 2017 with completion by December 31, 2018.

---

TAB 5

Documentation to assist in determining if limitation is a determining factor.

NextEra Energy Resources (NEER), with approximately 18,300 MW of generating capacity at December 31, 2013, is one of the largest wholesale generators of electric power in the U.S., with nearly 17,800 MW of generating capacity across 24 states, and with approximately 400 MW in 4 Canadian provinces. NEER produces the majority of its electricity from clean and renewable sources, including wind and solar. NEER also provides full energy and capacity requirements services, engages in power and gas marketing and trading activities, participates in natural gas, natural gas liquids and oil production and pipeline infrastructure development and owns a retail electricity provider. NEER has a long term commitment to both wind and solar with an outlook to significantly expand our fleet of clean energy generating capacity.

NEER is poised to install and operate more MWs of solar than any other competitor in North America. As of February 19, 2015, NEER has 730 MW of solar PV and solar thermal projects in operation. In addition, NEER has approximately 1,040 MW of solar PV projects in construction or late stage development.

The Applicant is a national wind and solar developer with the ability to locate projects of this type in other states within the United States and other regions within Texas with favorable solar characteristics. The Applicant is actively assessing and developing other projects that are competing for limited investment funds. With Texas wholesale electricity prices already below the international average, it is necessary to limit the property tax liabilities for a solar project in order to be able to offer electricity at prices that are marketable to Texas customers at competitive rates. Markets such as California that have state wide available subsidies for renewable energy projects, and which have higher average contracted power rates, offer an attractive incentive for developers to build projects in those markets over Texas.

The property tax liability of a project without tax incentives in Texas would reduce the return to investors and financiers to an unacceptable level at today's contracted power rates under a power purchase agreement (PPA). Therefore, the applicant would not be able to finance and build the project in Texas even with a signed PPA because of the low price in the PPA. Without the 313 Value Limitation, the applicant would be forced to walk away from this project and spend the potential investment in other states where the rate of return is higher.

*Description of Qualified Investment*

Bluebell Solar, LLC plans to construct an up to 173 MW solar electric generating project in Sterling County.

This application covers all qualified property within Sterling City ISD necessary for the commercial operations of the proposed solar project described in Tab 4. Approximately 769,000 PV panels and 44x4 MW inverters will be located in Sterling County, all of which will be located in Sterling City ISD. For purposes of this application, the Project anticipates using Yingli or other high quality Chinese manufactured PV Panels and GE inverters.

Mr. Bob Rauch, Superintendent  
Sterling City Independent School District  
700 7<sup>th</sup> St.  
Sterling City, TX 76951

**Re: Chapter 313 Job Waiver Request**

Dear Mr. Rauch,

Bluebell Solar, LLC requests that the Sterling City Independent School District's Board of Trustees waive the job requirement provision as allowed by Section 313.025(f-1) of the tax code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property owner that is described in the application.

Bluebell Solar, LLC requests that the Sterling City Independent School District makes such a finding and waive the job creation requirement for 10 permanent jobs. In line with industry standards for job requirements, Bluebell Solar, LLC has committed to create one qualified job in Sterling City ISD.

Solar projects create a large number of full and part-time, but temporary, jobs during the construction phase of the project, but require a relatively small number of highly skilled technicians to operate and maintain the project after commercial operation commences.

The number of jobs committed to in this application is in line with the industry standards for a solar project this size. This is evidenced by previously filed limitation agreement applications by solar developers who also requested a waiver of the job requirements. In addition, there are educational materials and other documentation that also suggest that Bluebell Solar, LLC has the appropriate number of jobs for this project.

The permanent employees of a solar project maintain and service PV Panels, and inverters, underground electrical connections, substations and other infrastructure associated with the safe and reliable operation of the project. In addition to the onsite employees, there may be managers or technicians who support the project from offsite locations.

Sincerely,

A handwritten signature in black ink, reading "J. Weston Jackson", followed by a long horizontal flourish.
