

Application for Appraised Value Limitation on Qualified Property (Tax Code, Chapter 313, Subchapter B or C)

Economic Development
and Analysis
Form 50-296-A

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at www.texasahead.org/tax_programs/chapter313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

Tab Item 5

Documentation to assist in determining if limitation is a determining factor:

The Applicant for this Project has entered into a number of contracts related to the project, including long-term lease option agreements with area landowners and service agreements and scopes with various consultants (environmental, airspace, etc.) to assess the suitability of the site, and a request for studies leading to an interconnection agreement with the transmission provider. None of these contracts obligate Applicant to construct the Project.

In order for the project to qualify for the federal income tax Production Tax Credit (PTC), the Applicant was required to complete a minimum amount of PTC qualification work before the statutorily imposed deadline of December 31, 2015. This work consisted of earth-moving to prepare two holes for turbine foundations (though foundations were not installed) and installation of 2,016 linear feet of road connecting the two foundation holes. These were not deemed taxable improvements by the Scurry County Central Appraisal District and no tax bill was delivered.

The Applicant is a national wind developer with the ability to locate projects of this type in other states within the United States and other regions within Texas with favorable wind characteristics. The Applicant is actively assessing and developing other projects outside of Texas that are competing for limited investment funds. In addition to its projects in Texas, the developer is assessing or developing projects in Oklahoma, Nebraska, Indiana, Iowa, North Dakota, South Dakota, Montana, New Mexico, Arkansas, Alabama, and Mississippi. This appraised value limitation is critical to the ability of the Project to move forward as currently sited.

Without the available tax incentives, the economics of the Project become far less attractive and the likelihood of selling the electricity at a competitive price will significantly decrease. The Applicant for this project is competing against other developers who have been offered or are in the process of applying for Value Limitation Agreements with other school districts. Obtaining the limitation is critical to the economic and competitive viability of this Project. Without the limitation approval, the Applicant would likely terminate the Project, including the aforementioned contracts, leases, and limited improvements, in order to reallocate resources in areas with more favorable economics.

Tab Item 7

Description of Qualified Investment

Dermott Wind, LLC plans to construct a 230 MW wind farm in Scurry County consisting of 100 turbines.

The Applicant is requesting an appraised value limitation on all of the property constructed or placed upon the real property within Snyder ISD. The qualified investment in Snyder ISD is expected to include approximately one-hundred (100) GE 2.3MW wind turbine generators, including 80m towers, nacelles, rotors with 116m rotor diameter, and reinforced concrete foundations, pads, underground and overhead electric collection cables, access roads, met towers, spare parts and control systems as necessary for the commercial generation of electricity. While the turbine locations have not yet been finalized, they are expected to be sited in a series of rows running approximately east to west in the northwestern part of Scurry County. The map in Tab 11 shows the preliminary turbine locations. The exact placement of these turbines is subject to ongoing planning, soil and geotechnical studies, and engineering and will be determined before construction commences.

In addition to the wind turbines, the Project will also include an operations and maintenance building that will likely be located in the approximate center of the Project. (It is also shown on the map in Tab 11.) The Project will also require a series of new access roads to the turbines, underground electrical collection cables, permanent meteorological towers, a substation, and an overhead transmission line connecting the project substation to the Point of Interconnection.

The 2,016 ft. of road constructed on the project in late 2015 to assist with Production Tax Credit qualification will not be part of the qualified investment or qualified property.

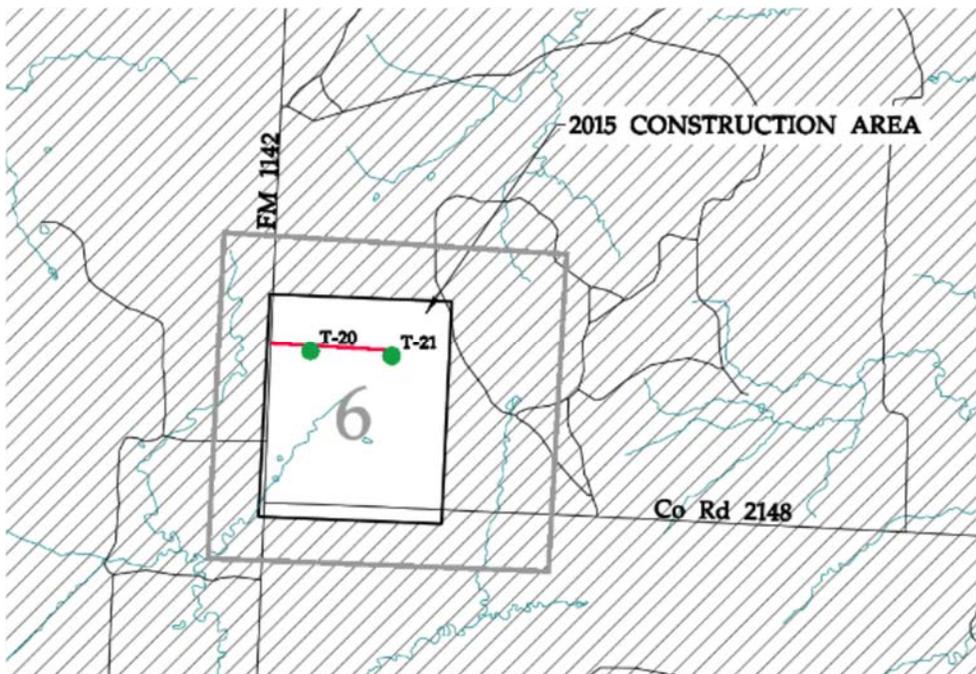

Tab Item 10

Description of all property not eligible to become qualified property

Two-thousand and sixteen feet (2016 ft.) of road was constructed on-site in late 2015 to assist with PTC qualification as noted in Tab Item 5. The installation cost of this road was \$71,568.00. This will not become qualified property and will be excluded from the limitation.

These were not deemed taxable improvements by the Scurry County Central Appraisal District and no tax bill was delivered.

The construction occurred in the SW/4 of Section 567, Block 97, H & TC Survey as pictured below.

Tab Item 12

Request For Waiver of Job Creation Requirement

April 28, 2016

Deputy Superintendent Randy Burks
Snyder ISD
2901 37th Street
Snyder, TX 79549

Re: Chapter 313 Job Waiver Request

Dear Deputy Superintendent Burks,

Please consider this letter to be Dermott Wind, LLC's formal request to waive the minimum new job creation requirement, as provided under Texas Tax Code 313.025(f-1).

The governing body of a school district may waive the new jobs creation requirement in Section 313.021(2)(A)(iv)(b) or 313.051(b) and approve an application if the governing body makes a finding that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property that is described in this application. Wind energy projects create a large number of full-time jobs during the construction phase, but these jobs are temporary by nature. Once the project is in operation, a small crew of full-time employees will maintain and operate the facility. Based upon our experience in the wind industry, we expect that six (6) employees would be needed to operate a 230 MW facility, and we can commit to creating six (6) full-time positions to fill those needs. All would be qualifying jobs as described in Section 313.021(3) of the Texas Tax Code.

The applicant requests that the Snyder ISD's Board of Trustees make such a finding and waive the job creation requirement. This waiver request is in line with industry standards for the job requirements for a wind energy facility of this size, as evidenced by limitation agreement applications that have been filed by other wind energy developers, and by documentation related to the development and operation of wind generation facilities.

The project stands to provide significant benefits to the community with respect to increased tax base and the ongoing royalty payments it will make to local landowners.

Kind Regards,

Will Furgeson
Development Director
