Board Finding Number 3.

The average salary level of qualifying jobs is expected to be at least \$41,600 per year. The review of the application by the State Comptroller’s Office is expected to indicate that this amount—based on Texas Workforce Commission data—complies with the requirement that qualifying jobs must pay 110 percent of the county average manufacturing wage. South Trent Wind indicates that total employment will be approximately five (5) new jobs.

Based on Texas Work Force Commission data for the 1st quarter of 2008 and weighting the average manufacturing wages on the basis of 30 percent of the project being located in Nolan County and 70 percent in Taylor County, the average manufacturing wage is estimated to be \$35,127. When the 110 percent standard is applied, the manufacturing wage threshold for the project is \$38,620. This proposed wage for the project exceeds this amount by \$2,980 or nearly eight percent.

In support of Finding 3, the economic impact evaluation states:

The economic assumptions underlying the analysis are summarized in the table below. The following table highlights the total employment, payroll, and capital investment for the wind farm project in Nolan and Taylor Counties. Based on approved Texas Economic Development Act wind farm applications and industry standards, the typical wind farm employs one person per 15 wind turbines. South Trent Wind’s project is consistent with this ratio. As noted in the introduction, the financial impact of the requested property value limitation on the finances of Trent I.S.D. is addressed in a separate report.
