TAB 4

Detailed Description of the Project

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Seymour Hills Wind Project, LLC (Seymour Hills) is requesting an appraised value limitation from Seymour Independent School District (ISD) for the Seymour Hills Wind Project (the "Project"), a proposed wind powered electric generating facility in Baylor County. The proposed Seymour ISD Project (this application) will be constructed within a Reinvestment Zone that will be created by Baylor County in by August 2017. A map showing the location of the project is included in TAB 11.

The proposed Project is anticipated to have a capacity of up to 30 MW located in Seymour ISD. The exact number and location of wind turbines and size of each turbine will vary depending upon ongoing wind and siting analysis, turbine manufacturer's availability, prices, and the megawatt generating capacity of the Project when completed. Current plans are to install 2.5 MW GE turbines with an estimated 12 turbines located in Seymour ISD. Seymour Hills is also constructing transmission generation tie line in Seymour ISD which is estimated to be approximately 2 miles in length. The Applicant requests a value limitation for all materials, facilities and equipment installed for the Project, including but not limited to, wind turbines, towers, foundations, roadways, buildings and offices, meteorological towers, collection system, communication system, electric substation, electric switchyard, electric transformers, transmission line and associated towers, and interconnection facilities.

Full construction of the Project began in November of 2018 with completion by anticipated by May 31, 2019.

**NOTE:* The map in TAB 11 shows the potential locations of 12 wind turbines, a collector substation and an operations and maintenance (O&M) building within Seymour ISD boundaries; however, the final number of turbines and the location of each of these facilities is dependent upon ongoing negotiations with power purchasers and other factors.

TAB 7

Description of Qualified Investment

Seymour Hills Wind Project, LLC plans to construct up to a 30 MW wind farm in Baylor County.

This application covers all qualified property within Seymour ISD necessary for the commercial operations of the proposed wind farm described in Tab 4. Thirty megawatts (30 MW) will be located in Seymour ISD. Turbine placement is subject to change. For purposes of this application, the Project anticipates using 2.5 MW turbines manufactured by GE with an estimated 12 turbines located in Seymour ISD. Seymour Hills is also constructing approximately 2 miles of generation transmission tie line that will be in Seymour ISD.

This application covers all qualified investment and qualified property necessary for the commercial operations of the wind farm.

Qualified Investment and qualified property includes, but is not limited to, turbines, towers, foundations, transformers, pad mounts, buildings and offices, underground collection systems, electric substation, transmission lines, electrical interconnections, met towers, roads, and control systems necessary for commercial generation of electricity.

The map in TAB 11 shows the proposed project area with the preliminary turbine locations. The exact placement of these turbines is subject to ongoing planning, soil studies, and engineering and will be determined before construction begins.

Mr. John Anderson, Superintendent
Seymour Independent School District

Seymour, TX 76380

Re: Chapter 313 Job Waiver Request

Dear Mr. Anderson,

Seymour Hills Wind Project, LLC requests that the Seymour Independent School District's Board of Trustees waive the job requirement provision as allowed by Section 313.025(f-1) of the tax code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property owner that is described in the application.

Seymour Hills Wind Project, LLC requests that the Seymour Independent School District makes such a finding and waive the job creation requirement for 10 permanent jobs. In line with industry standards for job requirements, Seymour Hills Wind Project, LLC has committed to create 1 total job for the project, which will be in Seymour ISD.

Wind projects create a large number of full and part-time, but temporary jobs during the construction phase of the project, but require a relatively small number of highly skilled technicians to operate and maintain the project after commercial operation commences.

The industry standard for employment is typically one full-time employee for approximately every 15 turbines. This number will vary depending on the operations and maintenance requirements of the turbines selected as well as the support and technical assistance offered by the turbine manufacturer. The permanent employees of a wind project maintain and service wind turbines, underground electrical connections, substations and other infrastructure associated with the safe and reliable operation of the project. In addition to the onsite employees, there may be managers or technicians who support the project from offsite locations.

Sincerely,

Brandon Westlake
Tax Consultant
