## **Tab Item 8**

### **Description of Qualified Property**

Sage Draw Wind, LLC plans to construct a 300 MW wind farm consisting of 120 turbines in Lynn and Garza Counties and within the boundaries of Wilson ISD and Southland ISD.

The applicant is requesting an appraised value limitation on all of the qualified investment and the qualified property constructed or placed upon the real property within Southland ISD. For purposes of this application, the Project anticipates using General Electric (GE) 2.5 MW turbines. The qualified investment in Southland ISD is expected to include approximately sixty-five (65) GE 2.5 MW wind turbine generators, including 89m towers, nacelles, rotors with 127m rotor diameter, and reinforced concrete foundations, pads, underground and overhead electric collection cables, met towers, spare parts and control systems as necessary for the commercial generation of electricity. While the turbine locations have not yet been finalized, they are expected to be sited in a series of rows running approximately east to west in the Northeastern part of Lynn County and Northwestern part of Garza County. The map in Tab 11 shows the preliminary turbine locations. The exact placement of these turbines, as well the exact specifications, heights, and component parts, is subject to ongoing planning, soil and geotechnical studies, and engineering and will be determined before construction commences.

In addition to the wind turbines, the Project will also include the following qualified investment in Southland ISD (all in Lynn County):

- underground electrical collection cables
- permanent meteorological towers
- Project collector substation
- overhead transmission line connecting the Project collector substation to the Point of Interconnection.

The approximate location of each of these improvements is shown on the map in Tab 11.

Tab Item 12

Request for Waiver of Job Creation Requirement

See attached letter. Based on the attached letter, Sage Draw Wind, LLC is committing to creating six (6) jobs to support the entire Project. Although no individual employees will be assigned specifically to manage the portions of the Project located in Southland ISD or Wilson ISD, based on the number of turbines located in in each school district, the created jobs will be allocated among the school districts as follows:

Southland ISD  
3 jobs

Wilson ISD  
3 jobs

Re: Chapter 313 Job Waiver Request

Dear Superintendent Robinson,

Please consider this letter to be Sage Draw Wind, LLC's formal request to waive the minimum new job creation requirement, as provided under Texas Tax Code 313.025(f-1).

The governing body of a school district may waive the new jobs creation requirement in Section 313.021(2)(A)(iv)(b) or 313.051(b) and approve an application if the governing body makes a finding that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property that is described in this application. Wind energy projects create a large number of full-time jobs during the construction phase, but these jobs are temporary by nature. Once the project is in operation, a small crew of full-time employees will maintain and operate the facility. Based upon our experience in the wind industry, the industry standard for an operation project is one employee per 50 Megawatts of capacity. Based on this industry standard, we expect that six (6) employees would be needed to operate a 300 MW facility. Because approximately 54% of the project's wind turbine generators will be located in Southland ISD, we can commit to creating three (3) full-time positions to fill those needs. All would be qualifying jobs as described in Section 313.021(3) of the Texas Tax Code.

The applicant requests that the Southland ISD's Board of Trustees make such a finding and waive the job creation requirement. This waiver request is in line with industry standards for the job requirements for a wind energy facility of this size, as evidenced by limitation agreement applications that have been filed by other wind energy developers, and by documentation related to the development and operation of solar generation facilities.

The project stands to provide significant benefits to the community with respect to increased tax base and the ongoing royalty payments it will make to local landowners.

Sincerely,
