Detailed Description of the Project

*Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.*

Anson Solar Center 3, LLC (Anson Solar) is requesting an appraised value limitation from Anson Independent School District (ISD) for the Anson Solar Center 3 Project (the "Project"), a proposed solar powered electric generating facility in Jones County. The proposed Anson ISD Project (this application) will be constructed within a Reinvestment Zone that will be established by Jones County. A map showing the location of the project is included in TAB 11.

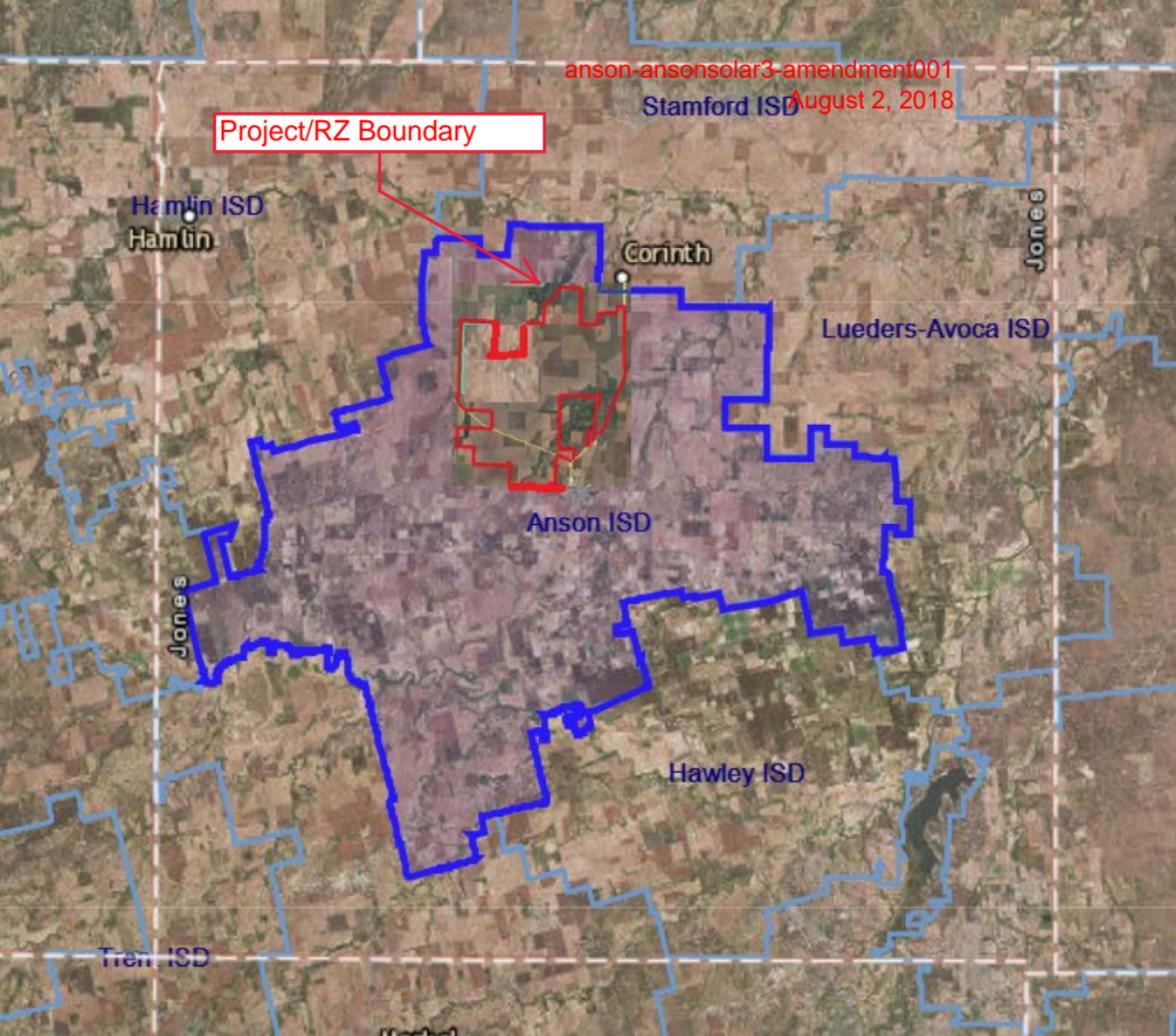

The proposed Project is anticipated to have a capacity of approximately 200 MW located in Anson ISD. The exact number and location of panels and inverters will vary depending upon ongoing siting analysis, manufacturer's availability, prices, and the megawatt generating capacity of the Project when completed. Current estimated plans are to install approximately 788,000 PV modules and 67 inverters with all improvements located in Anson ISD. The Applicant requests a value limitation for all facilities and equipment installed for the Project, including but not limited to; solar modules/panels, racking and mounting structures, inverters boxes, combiner boxes, meteorological equipment, foundations, roadways, paving, fencing, collection system, generation transmission tie line and associated towers, and interconnection facilities.

Full construction of the Project is anticipated to begin in the June of 2020 with completion by December 31, 2021.

*\*NOTE:* The map in TAB 11 shows the potential locations of improvements within Anson ISD boundaries; however, the final number of panels and inverters and the location of each of these facilities is dependent upon ongoing negotiations with power purchasers and other factors.

### Re: Chapter 313 Job Waiver Request

Dear Mr. Baccus,

Anson Solar Center 3, LLC requests that the Anson Independent School District's Board of Trustees waive the job requirement provision as allowed by Section 313.025(f-1) of the tax code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property owner that is described in the application.

Anson Solar Center 3, LLC requests that the Anson ISD makes such a finding and waive the job creation requirement for 10 permanent jobs. In line with industry standards for job requirements, Anson Solar Center 3, LLC has committed to create two qualified jobs in Anson ISD.

Solar projects create a large number of full and part-time, but temporary, jobs during the construction phase of the project, but require a relatively small number of highly skilled technicians to operate and maintain the project after commercial operation commences. The number of jobs committed to in this application is in line with the industry standards for a solar project this size. This is evidenced by previously certified limitation agreement applications by solar developers who also requested a waiver of the job requirements. In addition, there are educational materials and other documentation that also suggest that Anson Solar Center 3, LLC has the appropriate number of jobs for this project at one permanent job per 75MW - 100MW of installed capacity.

The permanent employees of a solar project maintain and service PV panels, and inverters, underground electrical connections, substations and other infrastructure associated with the safe and reliable operation of the project. In addition to the onsite employees, there may be managers or technicians who support the project from offsite locations.

Sincerely,

Branon Westlake  
Senior Tax Consultant
