Description of Qualified Property

Monte Cristo Windpower, LLC plans to construct an estimated 201 MW wind farm in Hidalgo County, located entirely within Edinburg CISD. Additional improvements of Qualified Property include:

- 88 Wind Turbines 82 wind turbines with a nameplate capacity of 2.2 MW and 6 wind turbines with a nameplate capacity of 3.45MW;
- 88 Wind Turbine Foundations;
- Several thousand feet of Transmission Collection System cable & Junction Boxes;
- Overhead Transmission and Interconnection infrastructure;
- Additional meteorological towers;
- All weather Road work sloped for drainage;
- Operations and maintenance building for storage of control systems necessary for commercial generation of electricity;
- Electric substation including power transformers, associated circuit breakers, switches, reactive power compensation equipment and control building & fencing of perimeter.

For purposes of this application, the Project anticipates using 82 wind turbines with a nameplate capacity of 2.2 MW and 6 wind turbines with a nameplate capacity of 3.45 MW. Although final turbine selection and location of the infrastructure may change, all equipment outlined above is expected to be located within Edinburg CISD boundaries. Current plans are to install turbines in one phase.

The exact placement of turbines is subject to ongoing planning, wind resource evaluation, engineering, land leasing, and turbine selection. The final number and location of turbines and supporting structures will be determined before construction begins. However, any changes in the number and location of turbines will not have a significant impact on the total investment. Monte Cristo intends to connect to ETT Lobo to North Edinburg, 345kV transmission line internal to the Project, located within Edinburg CISD boundaries. All of the infrastructure will remain within the project boundary and within the Enterprise Zone. The map in Attachment 11b shows the proposed project area with the anticipated improvement locations.
