# Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
  - the date on which the school district received the application;
  - the date the school district determined that the application was complete;
  - the date the school board decided to consider the application; and
  - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at [comptroller.texas.gov/economy/local/ch313/](http://comptroller.texas.gov/economy/local/ch313/). Detailed Description of the Project

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Air Liquide's project provides for the design and construction of a new world scale air separation unit (ASU) for the production of argon, oxygen, and nitrogen for distribution to customers in the Gulf Coast area. The feedstock for the ASU is atmospheric air and the merchant liquid products will be shipped by truck and rail. The proposed industrial gas plant will be constructed along Air Liquide industrial gas pipelines that run through Matagorda County.

It is anticipated that Air Liquide's proposed new plant will be connected to Air Liquide's industrial gas pipelines that run from Lake Charles Louisiana to Bishop, TX south of Corpus Christi. Products from this plant will be distributed via pipelines to Air Liquide's gas customers along these pipelines, by truck to Air Liquide's customers throughout the Texas-Louisiana Gulf Coast and by rail to customers outside this region. Air Liquide is considering alternate locations in both Texas and Louisiana from which to serve these customers.

Below is a list of the major equipment comprising the complex:

- Cryogenic storage tanks
- Compressors
- Heat exchangers
- Pumps
- Filters
- Insulation
- Electrical Switchgear
- Transformers
- Instrumentation equipment
- Equipment and structural foundations and supports
- Control Equipment
- Industrial gas loading and unloading equipment and road works
- Industrial gas piping

Additional infrastructure to support this property will include:

- Site development/roads
- Utility piping
- Electrical substation modifications and water distribution.

**TAB 5**

*Documentation to assist in determining if limitation is a determining factor.*

The world leader in gases, technologies and services for industry and Health, air Liquide is present in 80 countries serving over 3.5 million customers. Oxygen, nitrogen and hydrogen are essential small molecules for life, matter and energy and have been at the core of the company's activities since its creation in 1902.

Air Liquide's Large Industries World Business Line (WBL) provides gases to customers in the refining, chemicals, energy and metallurgical industries . These gases are vital to the production processes of customers in such industries. The Group's gas and energy solutions enable businesses to reconcile optimal productivity with respect for the environment. Air Liquide is the undisputed world leader in this sector. The Large Industries WBL is representative both of Air Liquide's historic expertise and of the technologies of the future. The WBL has established its presence around the world through its design and installation of more than 400 air separation units (ASUs), some 100 hydrogen production plants (of which 38 are major units) and 18 cogeneration units.

This presence is strengthened by the Group's vast pipeline network, which allows Air Liquide to meet the air gas and hydrogen requirements of major customers in some of the world's largest industrial basins, in the United States, Europe and Asia. This project can be built and installed anywhere on their Gulf Coast pipeline network that runs from Corpus Christi, TX to Lake Charles, LA.

The applicant requires this appraised value limitation in order to move forward with the development of the project. Without this appraised value limitation, the impact of comparatively high Texas property taxes on the cost of the project does not allow the project to compete for global customers against similar projects operated by competitors of Praxair in the U.S. and around the world. Without this appraised value limitation Praxair would have to strongly consider making this investment at another site. Approval of this Value limitation application allows us to extend our relationships in Texas and be a contributor to the state's economic growth story.

Each year, the company or individual receiving abatement shall furnish the Chief Appraiser and the County with such information as may be necessary for maintaining the abatement, including investments made in the facility. Once the value has been established, the Chief Appraiser shall notify the affected jurisdictions which levy taxes of the amount of the assessment. The applicant shall provide this information to the Chief Appraiser and to Commissioners Court by March 15th of each year.
- (b) The agreement shall stipulate that employees and/or designated representatives of the County will have access to the Reinvestment and/or Enterprise Zone during the term of the abatement agreement to inspect the facility to determine if the company or individual is in compliance with the terms and conditions of the abatement agreement. All inspections will be made only after notification of not less than twenty four (24) hours and will only be conducted in such manner as not to unreasonably interfere with the construction and/or operation of the facility. All inspections will be made with one or more representatives of the company or individual present and in accordance with the company's safety standards.
- (c) Upon completion of construction, the County or the jurisdiction creating the Reinvestment and/or Enterprise Zone shall annually evaluate each facility receiving abatement to ensure compliance with the agreement and report possible violations to the Commissioners Court and County Attorney.
- (d) All proprietary information required by the County for purposes of monitoring compliance by a company with the terms and conditions of an abatement agreement shall be considered confidential to the extent permitted by law.
- (e) The company must file an annual status report by March 15th of each year of the abatement.

These reports will contain the amount of qualified taxable investment made, a total employee count that corresponds to employment counts reported in the Company's Quarterly Reports to the Texas Workforce Commission. It will also identify the number of employees filling the new positions created for the tax abatement. The report will demonstrate whether the company has met the conditions of the abatement agreement. If the company is deemed not in compliance with the agreement, the County Commissioners Court may cancel or modify the agreement at any time.

- (f) The agreement will be registered with both the Texas Department of Commerce and the State Comptroller. This report must contain a general description of the Reinvestment and/or Enterprise Zone as well as information about the specific agreement – the name of parties involved, the project, the portion of the property to be exempt, and duration of the agreement. *It is the responsibility of the property owner to annually certify to the Chief Appraiser and County Commissioners Court that the project is in compliance with the Reinvestment and/or Enterprise Zone creation agreement and tax abatement agreement.*
- (g) Matagorda County may cancel the entire agreement if the property owner fails to comply with terms of the written agreement and obtain a recapture of all tax abatements previously given to the company or individual.

## **Section 10 ASSIGNMENT**

- (a) Abatement may be transferred and assigned by the holder to a new owner or Lessee of the same facility upon the approval by resolution of County Commissioners Court subject to the financial capacity of the assignee and provided that all conditions and obligations in the abatement agreement are guaranteed by the execution of a new contractual agreement with the County Commissioners Court.

- (c) No assignment or transfer shall be approved if the parties to the existing agreement, the new owner or new Lessee are liable to Matagorda County or any affected taxing jurisdiction for outstanding taxes or other obligations.
- (d) Approval of a transferred and assigned agreement shall not be unreasonably withheld.

## **Section 11 FEDERAL AND STATE COMPLIANCE**

- (a) **Confidentiality of Proprietary Information/Public Information Act.** Applicant acknowledges that the County is a governmental body subject to the Public Information Act and thus is required to release information in accordance with the Public Information Act. Applicant may be required to provide information in connection with its application or ongoing monitoring requirements that describes the specific processes or business activities to be conducted or the equipment or other property to be located on the property for which abatement is being sought. Section 312.003 of the Tax Code provides for the confidentiality of such information provided to

a taxing unit in connection with an application or request for tax abatement until the tax abatement agreement is executed. Applicant acknowledges that Section 312.003 affords confidentiality for such information only until the tax abatement agreement is executed. Applicant further agrees to and shall clearly and conspicuously mark any information that it considers to be proprietary, trade secret, or otherwise confidential in its application or other information furnished to the County to facilitate the procedures for notice to third party under the Public Information Act, which are contained at Section 552.305 of the Government Code.

(b) **Immigration Compliance/Use of E-Verify Required.**

1. **Compliance with U.S. Immigration Reform and Control Act of 1986.** To the best of Applicant's knowledge, having undertaken reasonable diligence, none of the Applicant's personnel is an unauthorized alien and Applicant at all times shall comply with the U.S. Immigration Reform and Control Act of 1986, as amended. Applicant further agrees that it shall not subcontract services to any subcontractor who utilizes persons not eligible for employment within the United States.
2. **Use of E-Verify required.** The United States Department of Homeland Security's Employment Eligibility Program is known as E-Verify. The E-Verify Program is used to electronically confirm an employee's eligibility to work in the United States; however it is not a substitute for complying with I-9 requirements. To be eligible for abatement, an Applicant shall comply with I-9 requirements and shall utilize E-Verify to confirm the eligibility of its employees to work in the United States.

- (c) **Abatement on properties within a TIFA reinvestment zone.** In the event of real property located within a reinvestment zone established under the Tax Increment Financing Act (TIFA) (codified at Chapter 311 of the Tax Code), the County may enter into an Agreement with an owner of real property in the TIFA reinvestment zone regardless of whether the County deposits or agrees to deposit tax increment into the tax increment fund. However, to be effective, the agreement to abate taxes on real property in a TIFA reinvestment zone must also be approved by the board of directors of the respective TIFA reinvestment zone and the governing body of each taxing unit that imposes taxes on real property in the TIFA reinvestment zone and deposits or agrees to deposit any of its tax increment into the tax increment fund for the TIFA reinvestment zone. If the County participates in the TIFA reinvestment zone and enters into an abatement agreement with an owner of real property in the TIFA reinvestment zone, then the taxes that are abated under the abatement agreement are not considered taxes to be imposed or produced by the County in calculating the amount of the tax increment of the County of the County's deposit to the tax increment fund for the TIFA reinvestment zone.

## **Section 12**

**Section 13**

Based upon that review, the “Guidelines and Criteria” may be modified, renewed or eliminated.
