# Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
  - the date on which the school district received the application;
  - the date the school district determined that the application was complete;
  - the date the school board decided to consider the application; and
  - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at [comptroller.texas.gov/economy/local/ch313/](http://comptroller.texas.gov/economy/local/ch313/). There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

## Detailed Description of the Project

### **Proposed Project Description**

Enterprise Products Operating LLC (Enterprise) currently operates its Mont Belvieu Manufacturing Complex in Chambers County. Enterprise proposes to construct a Propane Dehydrogenation (PDH2) unit at the Complex with a designated propylene production capacity of 1.654 billion pounds per year. A hydrogen byproduct will also be produced. Both the propylene and hydrogen products will be sent offsite via pipeline to enter the stream of commerce.

### **Manufacturing Process**

Fresh propane feed is fed to the reactors, where dehydrogenation of propane takes place and propylene is formed as a product. The reactor effluent is compressed and cooled to separate a hydrogen rich off-gas, and the condensed hydrocarbon liquid which consists of mainly propylene and propane is then further processed by the cryogenic separation to obtain pure propylene product. The un-reacted propane is recycled to the reaction section. The hydrogen rich off-gas is sent a hydrogen recovery unit (PSA) to recover the hydrogen.

### **PDH Manufacturing proposed facility - List of Improvements**

#### Plant Components

- Reactor section that converts propane feed to propylene
- Product separation system
- Utility systems to support process demands
- Cooling tower
- Hydrogen Recovery Unit (PSA)
- Ancillary tanks
- Emergency pumps and engines
- Process flare
- Wastewater treatment facilities.

## Limitation is a Determining Factor

1. **Does the applicant currently own the land on which the proposed project will occur?**

Applicant owns the land upon which the facility identified in Tab 7 will be constructed. The land is described in Tab 9.

2. **Has the applicant entered into any agreements, contracts or letters of intent related to the proposed project?**

The Applicant has not entered into any agreement with respect to the proposed project.

3. **Does the applicant have current business activities at the location where the proposed project will occur?**

Attached as Tab 10 is a depiction of the proposed project site. There are no existing improvements at the proposed project site.

4. **Has the applicant made public statements in SEC filings or other documents regarding its intentions regarding the proposed project location?**

Applicant has not made public statements regarding the potential development of the proposed project.

5. **Has the applicant received any local or state permits for activities on the proposed project site?**

No.

6. **Has the applicant received commitments for state or local incentives for activities at the proposed project site?**

No.

7. **Is the applicant evaluating other locations not in Texas for the proposed project?**

Applicant is a leading midstream energy company with a large pipeline footprint in the United States. These pipelines provide substantial flexibility in plant location. Applicant has gas manufacturing locations in Texas, Louisiana, New Mexico, Colorado, and Wyoming. Applicant also has significant interstate pipeline assets in Louisiana that can

and do move product to and from Texas. This allows potential manufacturing facilities to be located in St. Martin Parish, or Assumption Parish, Louisiana and the resulting manufactured product transported to Applicant's facilities in Texas.

Capital investments are allocated to projects and locations based on expected economic return and property tax liabilities can make up a substantial ongoing cost of operation. The Chapter 313 Value Limitation, if granted, would make the location in Texas a feasible investment, as is further discussed in Item 10 to Tab 5.

**8. Has the applicant provided capital investment or return on investment information for the proposed project in comparison with alternative investment opportunities?**

Yes, see Item 10 to Tab 5, as referenced below in the answer to question 10.

**9. Has the applicant provided information related to the applicant's inputs, transportation and market for the proposed project?**

N/A

**10. Are you submitting information to assist in the determinations as to whether the limitation on appraised value is a determining factor in the applicant's decision to invest capital and construct the project in Texas?**

See the attached Item 10 to Tab 5.

**Key Determining factors:**

- The Applicant has submitted in Item 10 to Tab 5 a discounted cash flow model (DCF) computing the proposed project's rate of return with the Chapter 313 appraised value limitation agreement and without the value limitation agreement. The DCF model shows that the rate of return with the valuation limitation agreement exceeds the minimum rate of return required by the Applicant to proceed with the proposed investment.
- An appraised value limitation agreement under Chapter 313 results in significant annual operating cost savings which would incentivize the Applicant to invest capital in the proposed project rather than making an alternative investment.
- The property tax burden for the Applicant's proposed project is significant. The property tax burden has a direct impact on the proposed project's economic viability and the decision to invest in Texas.
- The ability to enter into a Chapter 313 appraised value limitation agreement with the school district is a determining factor to invest in this project.
- Capital investments by the Applicant are based on expected economic return on investment. Property tax liabilities can make up a substantial ongoing cost of operation that directly impacts the rate of return on the investment in the proposed project. Without the tax incentive the economics of this project will be less competitive with other capital intensive projects and the viability of the proposed project becomes uncertain.

- Tax incentives play an important role in attracting capital intensive manufacturing facilities due to the high property tax burden in Texas.
- The Applicant is evaluating various manufacturing projects for development and where to commit substantial long term investment based on economic rate of return on investment in the proposed projects. The economic benefits provided by a Chapter 313 appraised value limitation agreement is an important component in this analysis.

**AT THE REQUEST OF THE APPLICANT, SUPPORTING DOCUMENTS IN ITEM 10 TO TAB 5 ARE CONSIDERED PROPRIETARY AND CONFIDENTIAL PURSUANT TO SECTION 313.028 OF THE TEXAS TAX CODE AND SECTION 552.101 OF THE TEXAS GOVERNMENT CODE, DUE TO THE NATURE OF THE FINANCIAL INFORMATION AND ANALYSIS SUBMITTED. Applicant has separately submitted Proprietary and Confidential Discounted Cash Flow Models comparing the rate of return on investment in the proposed project with and without a Chapter 313 Appraised Value Limitation Agreement. These models are confidential.**

## Detailed Description of Qualified Investment

### **Proposed Project Description**

Enterprise Products Operating LLC (Enterprise) currently operates its Mont Belvieu Manufacturing Complex in Chambers County. Enterprise proposes to construct a Propane Dehydrogenation (PDH2) unit at the Complex with a designated propylene production capacity of 1.654 billion pounds per year. A hydrogen byproduct will also be produced. Both the propylene and hydrogen products will be sent offsite via pipeline to enter the stream of commerce.

### **Manufacturing Process**

Fresh propane feed is fed to the reactors, where dehydrogenation of propane takes place and propylene is formed as a product. The reactor effluent is compressed and cooled to separate a hydrogen rich off-gas, and the condensed hydrocarbon liquid which consists of mainly propylene and propane is then further processed by the cryogenic separation to obtain pure propylene product. The un-reacted propane is recycled to the reaction section. The hydrogen rich off-gas is sent a hydrogen recovery unit (PSA) to recover the hydrogen.

### **PDH Manufacturing proposed facility - List of Improvements**

#### Plant Components

- Reactor section that converts propane feed to propylene
- Product separation system
- Utility systems to support process demands
- Cooling tower
- Hydrogen Recovery Unit (PSA)
- Ancillary tanks
- Emergency pumps and engines
- Process flare
- Wastewater treatment facilities.

On July 10, 2018, at a regular, public meeting of the Commissioners Court of CHAMBERS COUNTY, TEXAS (“the Court”), the Court conducted a hearing on the application of ENTERPRISE PRODUCTS OPERATING LLC (“Enterprise”) for renewal of the ENTERPRISE PRODUCTS OPERATING LLC 2013 REINVESTMENT ZONE (“the Zone”).

The Court finds and declares that:

1. The Court has adopted tax abatement guidelines and policies which are now in effect, thereby electing to become eligible to participate in tax abatement and economic development agreements in accordance with the Texas Tax Code (“the Code”).
2. On February 26, 2013, the Court designated the Zone by Order to affect tax abatement on qualified investments. In accordance with Chapter 312.203 of the Code, the designation of a reinvestment zone for tax abatement expires five (5) years after the date of designation.
3. The Zone expired on February 25, 2018. Chapter 312.203 of the Code allows for a reinvestment zone to be renewed for a period of 5 years.
4. The request for renewal/re-designation of the Zone was timely submitted by Enterprise and received by the Court.
5. All notices and legal requirements have been given and/or satisfied prior to the consideration by the Court of the renewal of the Zone. Specifically, notice of today’s hearing was published in the manner required by law and notice was timely given to the presiding officer of other taxing units of government as required by law.
6. The renewal of the Zone will contribute to the retention or expansion of primary employment and will attract major investment in the Zone that will be a benefit to the property to be included in the Zone and will contribute to the economic development of the County and surrounding area.

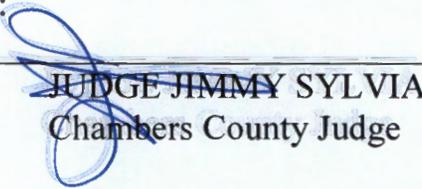

7. The improvements sought to be made are feasible and practical and will be a benefit to the land to be included in the Zone.
8. The area requested to be renewed as a reinvestment zone meets the criteria for designation as such in one of more ways as specifically provided by law.
9. The Zone shall take effect upon the effective date of this Order and expire five (5) years thereafter. The Zone may be renewed by the Court for one or more subsequent terms of five (5) years or less.

Therefore, upon motion made by Commissioner Senac seconded by Commissioner Nelson and affirmatively passed, be it RESOLVED and ORDERED by the Court that the 527.514-acre tract of land, more or less, described in the attached Exhibit "ZONE DESCRIPTION" is hereby renewed and re-designated as the ENTERPRISE PRODUCTS OPERATING LLC 2013 REINVESTMENT ZONE and is eligible for manufacturing / industrial tax abatement.

Established companies for which public information is available, or the wholly owned businesses of such companies, should include with the application a copy of their latest annual report to stockholders. Other applicants and new companies should attach a statement showing when the company was established; business references (name, contact and telephone number of principal bank, accountant and attorney) and may be required to submit an audited financial statement and business plan.

**PROJECT INFORMATION**

Only facilities listed in Section 3(a) of the Guidelines may receive abatement without applying for a variance. Check guideline definitions in Section 2 to confirm project qualification.
