(Tax Code, Chapter 313, Subchapter B or C)

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
  - the date on which the school district received the application;
  - the date the school district determined that the application was complete;
  - the date the school board decided to consider the application; and
  - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at [comptroller.texas.gov/economy/local/ch313/](http://comptroller.texas.gov/economy/local/ch313/). There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

### *Detailed Description of the Project*

Attach a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

In compliance with the criteria and guidelines set forth in Title 3, Chapter 313 of the Texas Property Tax Code, Bacon Switch Solar, LLC requests an appraised value limitation from Burkburnett Independent School District. SunChase Power LLC is proposing to construct a solar electric generating facility in Wichita County. The facility, which will encompass 2,238 acres across 20 parcels of land, will be located in the east-central portion of the county. Additionally, the entirety of the project will be within Burkburnett ISD. Please find attached in Tab 11 maps that further define the location of the facility.

The facility itself is expected to have a total capacity of 180 MW-AC and will feature 730,800 photovoltaic panels, 60 central inverters, and 7,850 linear feet of generation transmission tie line. Construction is anticipated to commence in June 2020. During this timeframe, the hiring of new employees as well as the purchase of equipment and machinery will also begin. Construction is projected to be complete by June 2021, when the plant will also be fully operational.

Bacon Switch Solar, LLC requests that this application includes but is not limited to the following components of this project:

- Solar Modules & Panels
- Inverter Boxes
- Meteorological Equipment
- Operation & Maintenance Building
- Electrical Substations
- Associated Towers
- Racking & Mounting Structures
- Combiner Boxes
- Foundations
- Roadways, Paving, & Fencing
- Generation Transmission Tie Line
- Interconnection Facilities

Bacon Switch Solar, LLC is a solar energy project managed by SunChase Power LLC. SunChase Power LLC is a renewable energy company focused on developing utility-scale and industrial solar energy projects. Their management team has been influential in the development of over 4,000 megawatts of renewable energy projects, bringing years of experience to the development process. They are committed to the future of renewable energy as well as building quality stakeholder relationships in the communities they choose to invest in.

## Tab 5

### *Limitation as a Determining Factor*

SunChase Power LLC is considering a variety of other locations for Bacon Switch Solar, LLC but believes Wichita County, Texas and Burkburnett ISD would be an ideal location for this solar facility. In the event a 313 agreement is not permitted, SunChase Power LLC will allocate the investment for Bacon Switch Solar, LLC to another area outside of Texas namely Oklahoma, Louisiana, Arkansas, Mississippi, Tennessee, or Florida. Unfortunately, this would also preclude Wichita County and Burkburnett ISD from receiving the economic benefits associated with the development of a solar facility within their jurisdictions.

SunChase Power LLC is a renewable energy company focused on developing utility-scale and large industrial behind-the-meter solar energy projects. They work with landowners and large industrial electricity users to identify promising locations for profitable solar energy projects, and bring those projects to market. SunChase Power LLC has a national footprint, and the ability to locate projects of this type in other states in the U.S. with strong solar characteristics. SunChase Power LLC has a national footprint, and the ability to locate projects of this type in other parts of Texas and/or other states in the U.S. where utility-scale solar is viable.

Property taxes are often the highest operating expense for a solar generation facility, as solar plants do not have any associated fuel costs to produce electricity. Further, with the Texas wholesale electricity price already below the international average, the necessity of limiting the property tax liability becomes paramount. The magnitude at which tax expenses affect the feasibility of a project is what causes agreements like the Ch. 313 to be so important to companies like this applicant. If the 313 is not granted, the rate of return drops too low for investors to tolerate, and the capital once allocated to the project must be reapportioned to out-of-state projects with better cash flows (due to tax incentives and higher wholesale electricity rates). Effectively, whether or not the project is built hinges heavily on the execution of a 313 agreement. SunChase Power LLC is always evaluating various manufacturing projects for development and where to commit substantial long-term investment based on economic rate of return on investment in the proposed projects. The economic benefits provided by a Chapter 313 Value Limitation is one of the most important components in their analysis.

Not only SunChase Power LLC, but all prudent manufactures, know tax incentives play an important role in attracting capital intensive manufacturing facilities due to the high property tax burden in Texas because of the direct impact on any proposed project's economic viability, so the decision to invest in Texas, or any other state, requires any capital investment by SunChase Power LLC to be based on expected economic return on their investment. With the property tax liabilities making up a substantial ongoing cost of operation that directly impacts the rate of return on the investment for the Bacon Switch Solar Project. Without the tax incentive, the economics of this project will be less competitive with other capital-intensive

projects and the viability of the proposed project becomes uncertain. SunChase Power LLC looks at a confidential Discounted Cash Flow model (DCF) computing the proposed project's rate of return with the Chapter 313 appraised value limitation agreement and without the value limitation agreement. The DCF model shows that the rate of return with the valuation limitation agreement exceeds the minimum rate of return they require to proceed with the proposed investment. Therefore, receiving a value limitation agreement under Chapter 313 results in significant annual operating cost savings which would incentivize SunChase Power LLC to invest capital in the proposed project rather than making an alternative investment. This makes the ability to enter into a Chapter 313 appraised value limitation agreement with the school district "the determining factor" to invest in this project.

*Request for Waiver of Job Requirements*

Please refer to the proceeding letter attached.

April 4, 2019

Dr. Tylor Chaplin  
Burkburnett ISD  
100 N. Avenue D  
Burkburnett, TX 76354

**RE: Bacon Switch Solar, LLC Chapter 313 Job Waiver Request**

Dear Dr. Tylor Chaplin,

SunChase Power LLC is requesting that Burkburnett ISD's Board of Trustees waive the job requirement provision as allowed by Section 313.025 (f-1) of the Texas Tax Code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility.

SunChase Power LLC requests that Burkburnett ISD makes such finding and waive the job creation requirement for 10 permanent jobs. In line with the current industry standards for job requirements, Bacon Switch Solar, LLC has committed to create 2 qualifying jobs in Burkburnett ISD.

Solar projects create many jobs, both full and part time. Additionally, during the construction phase, solar projects create many temporary jobs; however, after construction is completed solar facilities only require a relatively small number of workers to operate and maintain the plant. The number of jobs Bacon Switch Solar, LLC has committed to create is congruent with current industry standards for maintenance and operation of a facility of this capacity. This is evidenced by previously certified limitation agreement applications by solar developers who also requested and were granted a waiver of the job requirements based on the industry standard of 1 worker per 75-100 MW.

The permanent employees of a solar facility maintain and service the photovoltaic panels and inverters, underground electrical connections, substations, as well as other infrastructure associated with the safe and reliable operation of the facilities. In addition to onsite employees, there may also be managers and/or technicians who provide support to the facility remotely.

The establishment of Bacon Switch Solar, LLC will undoubtedly be beneficial to the economic development of Wichita County and the advancement of renewable energy. Thank you for your consideration of this request. If you have any questions, feel free to contact us.

Sincerely,

Mike Fry, Director—Energy Services

2018	Q3	\$773.00
<b>2017-2018</b>	<b>Q Average</b>	<b>\$763.00</b>

In order to calculate Wichita County Average Weekly Wage for all Jobs, the following calculations were completed:

Quarterly Average Calculation:

Step 1:  $\$776.00 + \$760.00 + \$743.00 + \$773.00 = \$3052.00$

Step 2:  $\$3052.00 / 4 =$  **\$763.00**

**Calculation B: 110% of Wichita County Average Weekly Wage for Manufacturing Jobs**

Year	Quarter	Average Weekly Wage
2017	Q4	\$1472.00
