Application for Appraised Value Limitation on Qualified Property (Tax Code, Chapter 313, Subchapter B or C)

Economic Development
and Analysis
Form 50-296-A

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at www.texasahead.org/tax_programs/chapter313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

TAB 4

Detailed Description of the Project

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

BT Yixin Solar, LLC (BT Yixin Solar) is requesting an appraised value limitation from Chilton Independent School District (ISD) for the BT Yixin Solar Project (the “Project”), a proposed solar powered electric generating facility in Falls County. The proposed Chilton ISD Project (this application) will be constructed within the County Reinvestment Zone No. 2019-01 that was established by Falls County on August 26, 2019. A map showing the location of the project is included in TAB 11.

The proposed Project is anticipated to have a capacity of approximately 120 MW located in Chilton ISD. The exact number and location of panels and inverters will vary depending upon ongoing siting analysis, manufacturer’s availability, prices, and the megawatt generating capacity of the Project when completed. Current estimated plans are to install approximately 361,237 PV modules and 51 inverters with all improvements located in Chilton ISD. The Applicant requests a value limitation for all facilities and equipment installed for the Project, including but not limited to; solar modules/panels, racking and mounting structures, inverters boxes, combiner boxes, meteorological equipment, foundations, roadways, O&M building, paving, fencing, collection system, electrical substations, generation transmission tie line and associated towers, and interconnection facilities.

Full construction of the Project is anticipated to begin in the Q2 2020 with completion by December 31, 2021.

**NOTE:* The map in TAB 11 shows the potential locations of improvements within Chilton ISD boundaries; however, the final number of panels and inverters and the location of each of these facilities is dependent upon ongoing negotiations with power purchasers and other factors.

TAB 5

Documentation to assist in determining if limitation is a determining factor.

Belltown Power was founded in the UK in 2013 by Michael Kaplan, Tom Hill-Norton and Andy Black as a fully integrated renewable energy power company. With a small team of dedicated investment and engineering professionals, Belltown delivered over 200MW of onshore wind, solar PV and hydro projects in under 4 years through employing a proven, disciplined process to project delivery.

In early 2017, Belltown entered a new phase of growth as we target the development and operation of large-scale renewable energy projects globally. Belltown now has five offices on two continents and a rapidly growing team targeting opportunities in developed and emerging markets.

Belltown Power is keen to develop and build the proposed BT Yixin Solar Project as per this application, but since this Project is still in the early stages of development, further investment could be, if necessary, redeployed to other counties and states competing for similar solar projects. Belltown Power is active in in other states and internationally and each project individually competes for a finite pool of capital investment. State and local tax incentives contribute to the lowering of the cost of power sold to our customers and making our investment more viable and marketable. Belltown Power has various projects in and continually compare investment opportunities, rate of return, and market viability of each project based upon project financial metrics. For example, Belltown Power currently has ongoing project developments in many states, including but not limited to, Pennsylvania and the U.K..

Due to the extremely competitive power market in Texas all PPA's economic model assumptions are based on the Project securing this Chapter 313 appraised value limitation and other local tax incentives. The property tax liabilities of a project without tax incentives in Texas lowers the return to investors and financiers to an unacceptable level at today's contracted power rates under a PPA. A signed PPA in the Texas market is at a much lower rate than other states because of competitively low electricity prices. Both parties of the PPA have an escape clause if the terms of the PPA cannot be met. Without the tax incentives in Texas, a project with a PPA becomes non-financeable. Therefore, this appraised value limitation is critical to the ability of the proposed Project to move forward as currently sited.

TAB 6

Description of how project is located in more than one district, including list of percentage in each district and, if determined to be a single unified project, documentation from the Office of the Governor (if applicable).

- 2) Chilton ISD - 100%
- 3) EMS District #2 - 100%

Panel placement is subject to change but for purposes of this application, the Project anticipates using approximately 361,237 PV modules or equivalent and 51 inverters.

This application covers all qualified investment and qualified property necessary for the commercial operations of the solar farm.

Qualified Investment and qualified property includes but is not limited to; solar modules/panels, racking and mounting structures, inverters boxes, combiner boxes, meteorological equipment, foundations, roadways, O&M building, paving, fencing, collection system, electrical substations, generation transmission tie line and associated towers, interconnection facilities and control systems necessary for commercial generation of electricity.

**NOTE:* The map in TAB 11 shows the potential locations of improvements within Chilton ISD boundaries; however, the final number of panels and inverters and the location of each of these facilities is dependent upon ongoing negotiations with power purchasers and other factors.

Re: Chapter 313 Job Waiver Request

Dear Mr. Hubbard,

BT Yixin Solar, LLC requests that the Chilton Independent School District's Board of Trustees waive the job requirement provision as allowed by Section 313.025(f-1) of the tax code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property owner that is described in the application.

BT Yixin Solar, LLC requests that the Chilton ISD makes such a finding and waive the job creation requirement for 10 permanent jobs. In line with industry standards for job requirements, BT Yixin Solar, LLC has committed to create one qualified job in Chilton ISD.

Solar projects create a large number of full and part-time, but temporary, jobs during the construction phase of the project, but require a relatively small number of highly skilled technicians to operate and maintain the project after commercial operation commences. The number of jobs committed to in this application is in line with the industry standards for a solar project this size. This is evidenced by previously certified limitation agreement applications by solar developers who also requested a waiver of the job requirements. In addition, there are educational materials and other documentation that also suggest that BT Yixin Solar, LLC has the appropriate number of jobs for this project at one permanent job per 125MW of installed capacity.

12837 Louetta Road, Suite 201 | Cypress, Texas 77429-5611

P: 713.266.4456 W: cwlp.net

The permanent employees of a solar project maintain and service PV panels, and inverters, underground electrical connections, substations and other infrastructure associated with the safe and reliable operation of the project. In addition to the onsite employees, there may be managers or technicians who support the project from offsite locations.

Sincerely,

Brandon Westlake
Senior Tax Consultant
