Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller, as indicated on page 9 of this application, separating each section of the documents in addition to an electronic copy. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, and has determined that all assertions of confidentiality are appropriate, the Comptroller will publish all submitted non-confidential application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller’s website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller’s rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller’s website to find out more about the program at comptroller.texas.gov/economy/local/ch313/. There are links to the Chapter 313 statute, rules, guidelines and forms. TAB 4*Detailed Description of the Project*

Ben Milam Solar 3 LLC proposes developing a solar photovoltaic facility designed to use solar power to generate electricity. If developed, the Project will be capable of generating approximately 250 MW on approximately 2530 acres. The exact capacity and specific technology will be determined during the design process and so the exact location of the improvements cannot be specified at this time. The qualified property and qualified investment may include, but will not be limited to, the following: solar modules/panels, metal mounting system with tracking capabilities, underground conduit, communications cables and electric system wiring, combiner boxes, a project substation including breakers, a transformer and meters, overhead transmission lines, inverter boxes, an operations and maintenance facility, fencing for safety and security, telephone and internet communication system, and meteorological equipment to measure solar irradiation and weather conditions. All of the property for which Ben Milam Solar 3 LLC is seeking a limitation of appraised value will be owned by the Applicant.

The Project site lies within Buckholts ISD on approximately 2530 acres.

Milam County has established a Reinvestment Zone to include all land that may be utilized for the Project. The land utilized for the Project will remain privately owned and will be secured via a long-term lease by the Applicant. The land currently hosts farming operations; there is no oil and gas activity on the land at this time.

Construction of the Project is anticipated to begin in 2021 with completion by September 2022. Once in operation, the Project may operate for twenty-five years or longer.

TAB 5*Documentation to Assist in Determining if Limitation is a Determining Factor*

The Applicant's development team has developed and delivered more than 2,500 MW of operational electric generation projects and brought together more than 100 years of energy industry finance, development, technology, and policy expertise. The Team combines experience in renewable energy development market with a capital efficient approach to deliver renewable energy projects.

The Project was selected as a candidate for development based on favorable solar data, nearby access to the electric grid, and favorable tax incentives under Chapters 312 and 313 of the Texas Tax Code. Obtaining a value limitation agreement is critical to the economic and competitive viability of this Project. While the Applicant is keen to develop and build the proposed Project as described in this application, the Applicant could still elect to devote resources to similar renewable energy projects that it has in development.

A number of variables regarding the proposed Project remain undetermined at this stage, including the approval of this application. Without the available 312 and 313 tax incentives, the economics of the Project become far less attractive and the likelihood of selling the electricity at a competitive rate is decreased.

While the application is being considered, the Applicant's parent company, Samsung C&T has the capacity to redeploy resources and to locate similar renewable energy projects in other states within the United States and locations around the world. Therefore, the Applicant is actively assessing and developing other projects that are competing for limited investment funds and the appraised value limitation is critical to the ability of the Project to move forward as currently sited.

Examples of the Applicant's other project locations that are competing with the Project for funding include:

States within the US

- California
- Georgia
- Michigan
- Illinois
- Virginia
- Tennessee
- Minnesota
- Arkansas
- Mississippi

Countries outside the US

Request for Waiver of Job Creation Requirement and supporting information (if applicable)

See Attached

July 22th, 2020

Mr. Joe Oliver
Superintendent
Buckholts ISD
203 South 10th Street
Buckholts, Texas 76518

RE: Request for Waiver of New Job Creation Requirements

Dear Mr. Oliver:

Pursuant to Section 313.025 (f-1) of the Texas Tax Code, Ben Milam Solar 3 LLC (BMS 3) formally requests that the Buckholts Independent School District Board of Trustees waive the minimum new job creation requirement provisions under Section 313.051(b) of the Texas Tax Code.

Under Section 313.025(f-1), the governing body of a school district may find that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility that is described in an Application for Appraised Value Limitation on Qualified Property. BMS 3 requests that Buckholts ISD make such finding and waive the job creation requirement for 10 permanent jobs. In line with the current industry standards for job requirements, BMS 3 has committed to create 1 qualifying job in Buckholts ISD.

During the construction phase, solar projects create many full-time jobs, but these jobs are temporary in nature. After construction is completed, the solar facilities only require a relatively small number of workers to operate and maintain the plant. The number of jobs BMS 3 has committed to create is congruent with current industry standards for maintenance and operation of a facility of this capacity. This is evidenced by previously certified limitation agreement applications by solar developers who also requested and were granted a waiver of the job requirements as well as the industry standard of 1 worker per 75-100 MW.

The permanent employees of a solar facility maintain and service the photovoltaic panels and inverters, underground electrical connections, substations, as well as other infrastructure associated with the safe and reliable operation of the facilities. In addition to onsite employees, there may also be managers and/or technicians who provide support to the facility remotely.

The establishment of BMS 3 will undoubtedly be beneficial to the economic development of Milam County, Buckholts Independent School District, and the advancement of renewable energy. Thank you for your consideration of this request. If you have any questions, feel free to contact us.

Very truly yours,
