Local Government Assistance & Economic Analysis  
Texas Comptroller of Public Accounts  
P.O. Box 13528  
Austin, Texas 78711-3528

RE: Amended Application to the Barbers Hill Independent School District from  
Enterprise Products Operating LLC.

To the Local Government Assistance & Economic Analysis Division:

Enterprise Products Operating LLC ("Enterprise") originally submitted its Application to the Barbers Hill Independent School District on June 25, 2012. The Board voted to accept the application June 25, 2012. The Application was determined complete by the District on July 3, 2012. The Comptroller's Office determined the Application complete as of July 24, 2012. On August 31, 2012, a positive recommendation was made by the Comptroller for the project, and the economic analysis was forwarded to the District. On November 15, 2012, Enterprise notified the District that it was going to submit an amended Application modifying the qualifying time period due to delays in the air permitting process. The District re-determined the Application complete as of November 20, 2012.

It is our understanding of the Comptroller's procedures that a change in qualifying time period invalidates the prior recommendation letter, and a new economic analysis must be completed for the project within 91 days of a re-determination that the amended Application is complete. Please prepare the economic analysis.

Please note, no construction has begun at the project site as of the date of the filing of the application and the District's determination that the application is complete. The Applicant is aware that the determination of a completed application by the Comptroller determines what property may be eligible for a value limitation agreement. The start of construction is awaiting the determination of a completed application by the Comptroller's Office. We are requesting an expedited review of the application, so that the applicant may begin construction at the project site.

Letter to Local Government Assistance & Economic Analysis Division

There is no existing property for this project. The site selected for the current project (Frac #7) is being used as a construction staging area for other projects at the complex (Not Frac # 7) which includes contractor's offices, warehouses, fencing and parking areas. The Applicant has begun to clear all the existing improvements from the site before Frac # 7 construction commences. The cost associated with these temporary improvements will not be part of the value limitation agreement with the Barbers Hill Independent School District.

New wage information has become available since the original submission of the Application to the District. The school district has determined that the wage information included in the Application represents the most recent wage data available at the time of the Application. The wage the Applicant has committed to paying on this project is well above the required statutory minimums.

Due to the size of the electronic file, both a paper and electronic copy of the application will be hand delivered to your office later today. In accordance with 34 Tex. Admin Code §9.1054, a copy of the amended Application will be submitted to the Chambers County Appraisal District.

Please feel free to contact me with questions.

Sincerely,

# Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

**Form 50-296**  
(Revised May 2010)

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application.

This notice must include:

- the date on which the school district received the application;
- the date the school district determined that the application was complete;
- the date the school board decided to consider the application; and
- a request that the comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original completed application to the Comptroller in a three-ring binder with tabs separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its Web site. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules as explained in the Confidentiality Notice below.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, make a recommendation to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application before the 151st day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to complete the recommendation, economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's Web site to find out more about the program at <http://www.window.state.tx.us/taxinfo/proptax/hb1200/index.html>. There are links on this Web page to the Chapter 313 statute, rules and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

**Proposed Project Description**

Enterprise Products Operating LLC ("Enterprise") currently operates the Mont Belvieu Manufacturing Complex. Enterprise proposes to build a new manufacturing NGL fractionator (Frac # 7) in Mont Belvieu, Texas.

**NGL Manufacturing Fractionation Plant**

NGL manufacturing is the process of fractionating raw NGL mix produced by natural gas processing plants into discrete NGL purity components (i.e., ethane, propane, normal butane, iso-butane, and natural gasoline).

**Manufacturing Process**

The manufacturing process is accomplished by applying heat and pressure to the mixture of raw NGL hydrocarbons and separating each discrete product at the different boiling points for each NGL component of the mixture.

The pipeline feed mixture is processed in feed filter, feed coalescer, and amine contractors to remove particulates, sulfides, and carbon dioxide. The Sweetened feed is then dehydrated and fed to the Deethanizer column. The Deethanizer is used to manufacture the feed into two fractions. The overhead vapor fraction consists of ethane and lighter components and is condensed by heat exchange against propylene refrigerant. (Propylene vapor from the Deethanizer condenser is first compressed in a two-stage machine and then is condensed in a wet-surface air cooler. The liquid propylene is then sub-cooled against low – temperature ethane before being fed back to the Deethanizer column condenser as refrigerant.) A portion of the condensed ethane is pumped out of the unit as ethane product to the existing storage facility, and the balance is refluxed back to the column. The Bottom fraction from the column, consisting mainly of propane and heavier components, is fed to the Depropazizer column. Heat for the manufacturing is provided by a number of reboilers, including a hot oil reboiler at the bottom of the column.

The Depropanizer column takes the feed from the Deethanizer bottom and separates it into a propane and lighter fraction, which goes overhead, and a butane and heavier fraction, exits the bottom. Condensing for the column is provided by a heat pump circuit and a we-surface air cooler. The propane heat pump circuit exchanges against the Depropazizer side reboiler and two reboilers attached to the Deethanzier column. The we-surface air cooler is used to sub-cool the condensed propane. Part of the propane is refluxed back to the column and the balance is sent to the existing storage complex as product. Heat for manufacturing is provided by a hot oil reboiler at the bottom of the column.

The stream from the bottom of the Depropanizer is fed to the Debutanizer column, which manufactures it into an overhead stream containing mixed butanes (primarily normal butane and isobutene) and a bottoms gasoline stream which contains pentanes and heavier. Part of the overhead butane stream is refluxed back to the column and the balance is sent to storage tanks as an intermediate feed for other units or as commercial butane product. The bottoms gasoline is routed to existing gasoline treating facilities. Condensing for the Debutanizer is provided by the Deethanizer Upper Side Reboiler, and heat for manufacturing in the Debutanizer is provided by a hot oil reboiler at the bottom of the column.

## Ability to Relocate:

Enterprise is a leading midstream energy company with large pipeline foot print in Louisiana. These pipelines provide substantial flexibility in plant location.

- Enterprise has significant assets in Louisiana including pipes that can and do move product to and from Texas.
- For every significant investment we make, there is a thorough review of the offered tax incentives in the region that helps determine our long term investment approach in a states or location.
- While Louisiana has had very competitive incentives to make big investments in their state, Texas has been equally competitive with the inclusion of the CH313 program.
- As a result, Enterprise has been continually planning adding Billions in investments in Texas to expand our massive infrastructure to support growth in the Texas upstream/downstream oil and gas and petrochemical industry.
- Support for these Texas industries can be managed via pipelines to and processes in neighboring states.
- All things being equal, such a choice would not be Enterprise's first preference but will continue to be part of our business evaluation and decision process.

Qualifying Time Period usually begins with the final board approval of the application and extends generally for the following two complete tax years.

Column A: This represents the total dollar amount of planned investment in tangible personal property the applicant considers qualified investment - as defined in Tax Code §313.021(1)(A)-(D). For the purposes of investment, please list amount invested each year, not cumulative totals.

Column B: Include estimates of investment for "replacement" property that is part of original agreement but scheduled for probable replacement during limitation period. The total dollar amount of planned investment each year in buildings or nonremovable component of buildings that the applicant considers qualified investment under Tax Code §313.021(1)(E).

Column D: For the years outside the qualifying time period, this number should simply represent the planned investment in new buildings or nonremovable components of buildings. Dollar value of other investment that may not be qualified investment but that may affect economic impact and total value for planning, construction and operation of the facility. The most significant example for many projects would be land. Other examples may be items such as professional services, etc. Note: Land can be listed as part of investment during the "pre-year 1" time period. It cannot be part of qualifying investment.

Notes: For advanced clean energy projects, nuclear projects, projects with deferred qualifying time periods, and projects with lengthy application review periods, insert additional rows as needed. This schedule must be submitted with the original application and any application for tax credit. When using this schedule for any purpose other than the original application, replace original estimates with actual appraisal district data for past years and update estimates for current and future years. If original estimates have not changed, enter those amounts for future years.
