

# Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

**Form 50-296**  
(Revised May 2010)

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application.  
This notice must include:
  - the date on which the school district received the application;
  - the date the school district determined that the application was complete;
  - the date the school board decided to consider the application; and
  - a request that the comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original completed application to the Comptroller in a three-ring binder with tabs separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its Web site. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules as explained in the Confidentiality Notice below.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, make a recommendation to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application before the 151st day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to complete the recommendation, economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's Web site to find out more about the program at <http://www.window.state.tx.us/taxinfo/proptax/hb1200/index.html>. There are links on this Web page to the Chapter 313 statute, rules and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

## ATTACHMENT 4

The Corpus Christi Liquefaction Project (“Project”) is being developed by Cheniere Energy Inc.’s (“Cheniere”) wholly owned subsidiary Corpus Christi Liquefaction, LLC (“Corpus Christi Liquefaction”). The Project is comprised of a natural gas liquefaction facility for export and a LNG regasification facility for import (the “Corpus Christi Terminal”) and an associated 23-mile pipeline (the “Corpus Christi Pipeline”). The Corpus Christi Pipeline is not part of this Application for Limitation on Appraised Value of Qualified Property. The Corpus Christi Terminal will be located on over 1,000 acres owned or controlled by Cheniere affiliates in San Patricio and Nueces Counties, Texas. The Corpus Christi Terminal is designed to liquefy for export up to 782 million MMBtu per year of LNG and to regasify for import up to approximately 146 million MMBtu per year of LNG. LNG will be imported or exported to the Corpus Christi Terminal across two docks, which are integral to the operation of the Project, via LNG carriers that will arrive from the Gulf of Mexico via marine transit of the Corpus Christi Ship Channel and the La Quinta Channel. The docks are not part of this Application for Limitation on Appraised Value on Qualified Property because they are located in Corpus Christi ISD; a separate Application for Limitation on Appraised Value of Qualified Property may be sought with Corpus Christi ISD. Construction of the Project is anticipated to commence following the execution of commercial contracts, the receipt of necessary government permits and approvals, and the closing of financial commitments sufficient to construct the Project. The total estimated capital investment of the Project in Gregory-Portland ISD is approximately \$9-10 billion.

The Project is being designed for three trains capable of producing in aggregate an average of 13.5 million tonnes per annum (mtpa). The Project is expected to be constructed in phases, with each LNG train commencing operations approximately six to nine months after the previous train. **A separate Application for Limitation of Appraised Value of Qualified Property is being filed for each train. This application is for the first train of the Project and all supporting infrastructure improvements including, but not limited to, land improvements, tanks, intraplant piping, plant control equipment, pollution control equipment, and buildings which are commonly referred to as outside battery limits (OSBL) improvements.**

The Corpus Christi Terminal includes, but is not limited to, the following major components described below. The Project will also include building, utilities and other facilities to support these major components.

### LNG Liquefaction

The liquefaction facilities include, but are not limited to, three ConocoPhillips Optimized CascadeSM LNG trains (LNG Trains 1, 2 and 3). Each LNG train contains the following equipment:

- Facilities which remove carbon dioxide (CO<sub>2</sub>), hydrogen sulfide (H<sub>2</sub>S), and sulfur compounds from the feed gas;
- Facilities to remove water and mercury from the feed gas;
- Facilities to remove heavy hydrocarbons (such as benzene, toluene, ethylbenzene, and xylene (BTEX)) from the feed gas;

- Six aero-derivative GE LM2500 G4+ gas turbines driving multiple liquefaction refrigerant compressors;
- Waste heat recovery systems;
- Induced draft air coolers;
- Associated fire and gas and safety systems;
- Associated control systems and electrical infrastructure;
- Utility connections and distribution systems; and
- Piping, pipe racks, foundations and structures within the LNG train battery limits.

#### LNG Storage

LNG will be stored in three, full containment (steel inside concrete) storage tanks. The insulated LNG tanks will each be designed to store a nominal volume of 160,000 cubic meters (1,006,400 barrels) of LNG at a temperature of -270 °F.

#### LNG Vaporization

Two trains of ambient air vaporizers (“AAV”) and associated sendout pumps will be installed.

#### Marine Facilities and LNG Transfer Lines

Two marine berths will be constructed. Together they will provide the capability to load or unload approximately 200 to 300 ships per year. The two berths are designed to accommodate a broad range of present and future LNG carrier size and type classes. Insulated LNG transfer lines will interconnect the LNG liquefaction and storage facilities with the marine berths.

#### **ATTACHMENT 4A**

Corpus Christi Liquefaction, LLC is a subsidiary of Cheniere Energy, Inc. (“Cheniere”) which is a Houston-based energy company primarily engaged in LNG-related businesses. In addition to Houston, TX, Cheniere has offices in Cameron Parish, Louisiana; Corpus Christi, Texas; London, U.K.; and Santiago, Chile. Cheniere owns and operates the Sabine Pass LNG import terminal (“Sabine Pass”) in Cameron Parish, Louisiana through its partial ownership interest in and management agreements with Cheniere Energy Partners, L.P. Cheniere is currently constructing two LNG liquefaction trains and associated export facilities at Sabine Pass and anticipates commencing construction of two additional trains in mid-2013. Cheniere has completed commercialization of the fifth train at Sabine Pass and is currently seeking to commercialize the sixth train, with permitting underway for both the fifth and sixth trains. Cheniere controls property elsewhere in Cameron Parish that is suitable for development as an LNG export facility. As a leading global LNG player, Cheniere has the ability to invest in new LNG liquefaction facilities elsewhere in the U.S. and around the world. Major LNG industry developments are ongoing currently in Australia, British Columbia and East Africa that provide significantly shorter shipping distances to major Asian markets.

Qualifying Time Period usually begins with the final board approval of the application and extends generally for the following two complete tax years.  
 Column A: This represents the total dollar amount of planned investment in tangible personal property the applicant considers qualified investment - as defined in Tax Code §313.021(1)(A)-(D).  
 For the purposes of investment, please list amount invested each year, not cumulative totals.  
 [For the years outside the qualifying time period, this number should simply represent the planned investment in tangible personal property].  
 Include estimates of investment for "replacement" property-property that is part of original agreement but scheduled for probable replacement during limitation period.  
 The total dollar amount of planned investment each year in buildings or nonremovable component of buildings that the applicant considers qualified investment under Tax Code §313.021(1)(E).

Column B: For the years outside the qualifying time period, this number should simply represent the planned investment in new buildings or nonremovable components of buildings.  
 Dollar value of other investment that may not be qualified investment but that may affect economic impact and total value for planning, construction and operation of the facility.  
 The most significant example for many projects would be land. Other examples may be items such as professional services, etc.  
 Note: Land can be listed as part of investment during the "pre-year 1" time period. It cannot be part of qualifying investment.

Column C: For advanced clean energy projects, nuclear projects, projects with deferred qualifying time periods, and projects with lengthy application review periods, insert additional rows as needed.  
 This schedule must be submitted with the original application and any application for tax credit. When using this schedule for any purpose other than the original application, replace original estimates with actual appraisal district data for past years and update estimates for current and future years. If original estimates have not changed, enter those amounts for future years.

Column D: For the years outside the qualifying time period, this number should simply represent the planned investment in new buildings or nonremovable components of buildings.
