RE: Application to the Floydada Independent School District from Wake Wind Energy, LLC

To the Local Government Assistance & Economic Analysis Division:

On June 28, 2013, a copy of the Application to the Floydada Independent School District from Wake Wind Energy, LLC was submitted for review to your office. While a map of the project site and land were included, the copy that was submitted did not include the land parcel sections listing upon which the project will be located. I am resubmitting a supplemented application to include the land description that was missing.

A paper copy of the application was hand delivered to your office on Tuesday. In accordance with 34 Tex. Admin Code §9.1054, a copy of the application will be re-submitted to the Floyd County Appraisal District.

Please feel free to contact me with questions.

Sincerely,

Kevin O'Hanlon
School District Consultant

Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

Form 50-296
(Revised May 2010)

CM # 7011 0110 0000 1718 9324

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application.

This notice must include:

- the date on which the school district received the application;
- the date the school district determined that the application was complete;
- the date the school board decided to consider the application; and
- a request that the comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original completed application to the Comptroller in a three-ring binder with tabs separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its Web site. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules as explained in the Confidentiality Notice below.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, make a recommendation to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application before the 151st day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to complete the recommendation, economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's Web site to find out more about the program at <http://www.window.state.tx.us/taxinfo/proptax/hb1200/index.html>. There are links on this Web page to the Chapter 313 statute, rules and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

CHECKLIST ITEM #4

A. Detailed Description of Project

Wake Wind Energy LLC anticipates constructing a wind-powered electric generating facility with an operating capacity of approximately 200-300 megawatts. The exact number of wind turbines and the size of each turbine will vary depending upon the wind turbines selected and the megawatt generating capacity of the project completed. Presently our plans are to install GE 1.7 megawatt turbines on property within the reinvestment zones in Crosby and Floyd Counties, Texas. Wake Wind Energy estimates that 210 megawatts are planned to be installed in Crosbyton CISD in 2014 as well as 90 megawatts in Floydada ISD. Wake Wind may later decide to install up to 34 additional megawatts in Floydada ISD.

The additional improvements for the Wake Project will include but are not limited to, wind turbines, towers, foundations, roadways, buildings and offices, anemometer towers, computer equipment, furniture, company vehicles, electrical transmission cables and towers and electrical substations. A portion of the transmission lines associated with the project may also extend into Dickens County.

B. Ability to Relocate to Another State or Region

Invenergy develops, owns and operates wind energy projects across the US, Canada and in Europe. We have numerous developments in the nearby states of Kansas and Oklahoma, where the wind resource is equivalent and their taxing incentives are similar to Texas. The Wake Wind Energy project is currently in competition with a 250 MW wind project in Oklahoma and a 200 MW wind energy project in Kansas.

CHECKLIST ITEM #5

Other School District Information

Wake Wind estimates that up to 210 megawatts of the estimated 300 megawatts of the project will be located in Crosbyton ISD. Wake Wind has filed an application for abatement with Crosbyton ISD.

Of the total project costs, Wake Wind estimates that 70% of the project will be located and taxed within Crosby County and Crosbyton ISD. Of the 30% remaining, 28% will be within Floyd County and Floydada ISD, and the final 2% in Dickens County and Spur ISD. No chapter 313 value limitation is being pursued with Spur ISD.

Re: Wake Wind Employment Estimate

To Whom it May Concern,

Invenergy has developed and placed into service 39 wind projects across the United States and in Canada and Europe, totaling over 3,400 MW. As one of the largest owner/operators of wind farms in the United States, Invenergy has significant experience staffing wind projects. Several factors determine the ultimate ratio of technicians to turbines; among these factors are site layout and turbine technology.

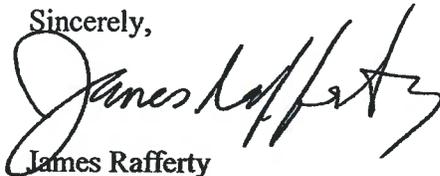

In Invenergy's experience, a ratio of 1 technician for every 10 – 15 turbines is typical for projects that are staffed by full-time employees. Invenergy's latest project under development, the Goldthwaite project will be one of the first Invenergy sites to deploy the GE 1.7 MW turbines. The GE 1.7 machine is the latest evolution of the GE 1.x fleet, of which Invenergy operates over 1,500 units.

We anticipate the technician to turbine ratio to be similar to that for the GE 1.5 MW turbines. As a result, we anticipate requiring approximately 1 technician per 12 GE 1.7 MW machines.

For independent estimates of full-time employment at wind farms in Texas, please see the National Renewable Energy Laboratory's report *Economic Development Impact of 1,000 MW of Wind Energy in Texas* (<http://www.nrel.gov/docs/fy11osti/50400.pdf>). Section 3.2.2 states that 60 full-time jobs are created for 1,000 MW of wind capacity. Assuming a 1.5 MW unit, that is approximately 1 job per 11 wind turbines.

If you have any questions, please do not hesitate to contact me at (312) 582-1518.

Sincerely,

James Rafferty
