**CHECKLIST ITEM #4****A. Detailed Description of Project**

Wake Wind Energy LLC anticipates constructing a wind-powered electric generating facility with an operating capacity of approximately 257.25 megawatts. The exact number of wind turbines and the size of each turbine will vary depending upon the wind turbines selected and the megawatt generating capacity of the project completed. Presently our plans are to install GE 1.7 megawatt turbines on property within the reinvestment zones in Crosby and Floyd Counties, Texas. Wake Wind Energy estimates that 116.62 megawatts are planned to be installed in Crosbyton CISD as well as 140.63 megawatts in Floydada ISD.

The additional improvements for the Wake Project will include but are not limited to, wind turbines, towers, foundations, roadways, buildings and offices, anemometer towers, computer equipment, furniture, company vehicles, electrical transmission cables and towers and electrical substations. A portion of the transmission lines associated with the project may also extend into Dickens County.

**B. Ability to Relocate to Another State or Region**

Invenergy develops, owns and operates wind energy projects across the US, Canada and in Europe. We have numerous developments in the nearby states of Kansas and Oklahoma, where the wind resource is equivalent and their taxing incentives are similar to Texas. The Wake Wind Energy project is currently in competition with a 250 MW wind project in Oklahoma and a 200 MW wind energy project in Kansas.
