Natural Resources & Mining, Leisure & Hospitality, and Local Government sectors play a large role in the Sterling County economy. These three sectors account for more than 72.0 percent of Sterling County's current total employment, compared to 23.8 percent for Texas. Consistent with a small job base, Sterling County's unemployment rate has fluctuated over the past five years. In 2001, unemployment in Sterling County reached 3.6 percent. By 2006, the unemployment rate had fallen to 3.3 percent, but not after climbing to 3.9 percent in 2002. This trend is not surprising given that an individual employer adding or shedding jobs can significantly impact this statistic.

Sterling County's population has been slowly increasing over the past decade. Since 2000, the County has added 46 residents, an increase of 3.3 percent. Sterling County's slow growth is even more stark when compared to Texas' significant population growth rate of 11.5 percent. The Texas State Data Center projects that Sterling County's population will surpass 1,484 residents by 2010.

While Sterling County's population has been slowly increasing, when compared to the state as a whole, its residents' income has not kept up either. Sterling County's per capita personal income is now just 62.4 percent of the Texas average, falling from a high of 68.2 percent in 1994. The 2004 per capita income for Sterling County is \$19,178 versus the Texas average of \$30,732.

Wages paid to area workers are also lagging state levels. Over the last 15 years, Sterling County's workers earned about 25-30 percent less than the state average. In 2005, a full-time employee earned \$26,331 or 29.3 percent more than a decade ago. Since 1990, however, the County's wage growth rate has fluctuated relative to the state as a whole. Full-time wages are now just 66.4 percent of the Texas average, falling from 80.0 percent in 1994.

**Board Finding Number 3.**

**Average salary levels of qualifying jobs are expected to be \$35,360, based on the amended Application, which meets or exceeds 110 percent of the current Sterling County average salary for manufacturing jobs.**

**Board Finding Number 4.**

**The level of the Applicant's total investment per qualifying job over the term of the Agreement is estimated to be approximately \$80 million.**

While this finding is included largely as an item of information, it is indicative of Goat Mountain Wind's planned capital investment in Sterling City ISD. This is the type of investment that is a foundation for improved economic activity in Sterling County.

The following discussion is included in the economic analysis for the project:

The benefits of Goat Mountain Wind to the Sterling County economy consist of the day-to-day operation of the wind energy project, normal operating expenditures, purchases from local vendors, and spending of people employed by these businesses. In the final analysis, the economic benefits of this spending materialize in the form of increased Sterling County employment and income. In addition, there are significant tax benefits to the Sterling City ISD, cities in the region, and the county.
