Application for Appraised Value Limitation on Qualified Property (Tax Code, Chapter 313, Subchapter B or C)

Economic Development
and Analysis
Form 50-296-A

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at www.texasahead.org/tax_programs/chapter313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

Detailed Description of Proposed Project

*In **Tab 4**, attach a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.*

ExxonMobil Oil Corporation ("ExxonMobil" or the "Applicant") proposes to construct a new world-class, high-performance polyethylene plant in Jefferson County, Texas, on unimproved land adjacent to the Applicant's existing Beaumont, Texas, plant (the "Project"). The proposed Project would have an annual capacity of 650,000 tons of polyethylene and would utilize Best Available Control Technology to minimize emissions in keeping with ExxonMobil's commitment to environmental stewardship.

The proposed improvements for which the tax limitation is sought will include one (1) polyethylene unit along with all process facilities, infrastructure and auxiliary equipment, including, but not limited to, compressors, drums, vessels, heat exchangers, pumps, filters, reactors, packaged systems, blowers and fans, dryers, dust collection units, mixers, feeders, extruder, rotary valves, scales, trolleys and hoists, utility service lines, storage tanks, blending silos, electrical switchgear, transformers, substations, instrumentation, equipment and structural foundations including supports, control equipment and facilities, warehouses, raw material and utility distribution improvements, flare, cooling towers, inter-plant piping and utilities, tie-ins, road improvements, control building, fire prevention and safety equipment, railroad tracks, railroad switches, rail car loading equipment, rail car washing buildings and equipment, any other tangible personal property utilized in the process, storage, quality control, shipping, waste management and general operation of the polyethylene unit and any other infrastructure additions related to the polyethylene unit.

The Applicant currently estimates that construction of the Project would commence in the second quarter of 2016 and would take approximately three years to complete, with commercial operations currently estimated to begin in the second quarter of 2019.

TAB 5

Documentation that the Limitation on Appraised Value is a Determining Factor in the Decision to Invest Capital and Construct the Project in Texas

Chapter 313.026(e) states “the applicant may submit information to the Comptroller that would provide a basis for an affirmative determination under Subsection (c)(2).” If you answered “yes” to any of the questions in Section 8, attach supporting information in Tab 5.

The Applicant is a wholly-owned subsidiary of Exxon Mobil Corporation, one of the largest integrated international oil and gas companies in the world with operations in more than 200 countries. As such, the Applicant competes with other members of the Exxon Mobil Corporation group for approval of a portion of the group’s capital investment budget to fund the capital investment necessary to construct the Project. Moreover, the Exxon Mobil Corporation group has the ability to invest, locate and develop new projects, such as the one that is the subject of this application, in numerous locations throughout the world.

ExxonMobil takes a disciplined, long-term approach to investing, regardless of the economic cycle and the geographic location. We consistently seek new global investment opportunities that create value for our shareholders. Our business model is to conduct an extensive evaluation before we make any final investment decision. A project team is evaluating these opportunities with a focus on global logistic capabilities, efficiency, scale and site integration. With respect to potential locations in North America, the proposed new facility could be constructed at any of our fully integrated refining manufacturing locations in Sarnia (Canada) and Baton Rouge (LA), or a non-integrated Refining manufacturing location in Joliet (IL).

Competitive abatement programs for the proposed new facility exist in alternative locations. The impact of the property tax burden on the economic return of the proposed new facility is a critical factor in the Applicant’s site selection evaluation and decision, as well as in obtaining approval for the Project internally within the Exxon Mobil Corporation group. For the tax year 2015, Beaumont ISD’s maintenance and operations (M&O) tax rate represents over 50% of the total property tax burden imposed on taxable property located at the Beaumont location. Consequently, a limitation on appraised value under Chapter 313 of the Texas Tax Code is a determining factor in the Applicant’s decision to invest capital and construct the Project in the State of Texas.

1) Jefferson County	\$0.365000
2) Sabine-Neches Navigation District	\$0.091640
