**Application for Appraised Value
Limitation on Qualified Property**

Presented to Tahoka ISD

March 9, 2017

Application for Appraised Value Limitation on Qualified Property (Tax Code, Chapter 313, Subchapter B or C)

Economic Development
and Analysis

Form 50-296-A

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at www.texasahead.org/tax_programs/chapter313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

Tab Item 4

Detailed Description of the Project

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Tahoka Wind, LLC ("Tahoka Wind") is requesting a Chapter 313 Appraised Value Limitation Agreement from Tahoka ISD for a proposed renewable energy project using wind turbines (the "Project") to be constructed in Tahoka ISD in Eastern Lynn County. The installed capacity of the proposed project is expected to be approximately 300 megawatts (MW). While turbine type and size have yet to be finalized, the current plan is to utilize approximately one-hundred and twenty (120) GE 2.5 MW wind turbine generators with 89m towers and rotors of 127m rotor diameter. The Project is anticipated to cover approximately 50,000 acres of privately-owned land, all currently used as farmland or pasture, and such uses can continue as the Project is designed to be compatible with such activities. Construction of the Project is expected to commence in December 2017, and is anticipated to be complete in the fourth quarter of 2018. In addition to the wind turbines, the Project will also include an operations and maintenance building, underground electrical collection cables, meteorological towers, a substation and an overhead transmission line that will connect the project substation to a substation owned by Sharyland Utilites (the Point of Interconnection). None of this property is covered under an existing appraisal district account number.

This Project is expected to have a useful life of 30 years or more.

Approximately 200 construction workers are anticipated at peak of construction activity, and approximately 6 permanent full time workers are anticipated for the plan management and operations and maintenance functions for the entire project.

Tab Item 5

Documentation to assist in determining if limitation is a determining factor:

Tahoka Wind, LLC ("Tahoka Wind") is a Delaware limited liability company. Tahoka Wind has one member with 100% ownership, Lincoln Clean Energy, LLC ("LCE"). LCE has successfully developed projects involving over \$1 billion in capital investment in some of the largest electricity markets in the United States, including California, New Jersey, and Texas.

The Applicant for this Project has entered into a number of contracts related to the project, including long-term lease option agreements with area landowners and service agreements and scopes with various consultants (environmental, airspace, etc.) to assess the suitability of the site, and a request for studies leading to an interconnection agreement with the transmission provider. None of these contracts obligate Applicant to construct the Project.

In order for the Project to qualify for the federal income tax Production Tax Credit (PTC), the Applicant was required to complete a minimum amount of PTC qualification work before the statutorily imposed deadline of December 31, 2016. This work consisted of earth-moving to prepare eight (8) holes for turbine foundations (though foundations were not installed) and installation of 2,000 linear feet of road connecting two foundation holes. These pre-construction activities were not deemed to have created taxable improvements by the Lynn County Central Appraisal District and no tax bill was delivered. The pre-construction activities did not result in the creation of any Qualified Property.

The Applicant's completion of this minor amount of PTC qualification work does not, either legally or financially commit it to constructing the Project in Lynn County.

The Applicant is a national wind developer with the ability to locate projects of this type in other states within the United States and other regions within Texas with favorable wind characteristics. The Applicant is actively assessing and developing other projects outside of Texas that are competing for limited investment funds. In addition to its projects in Texas, the developer is assessing or developing projects in Oklahoma, Nebraska, Indiana, Iowa, North Dakota, South Dakota, Montana, New Mexico, Arkansas, Alabama, and Mississippi. This appraised value limitation is critical to the ability of the Project to move forward in Tahoka ISD.

Without the available tax incentives, the economics of the Project become far less attractive and the likelihood of selling the electricity at a competitive price will significantly decrease. The Applicant for this Project is competing against other developers who have been offered or are in the process of applying for Value Limitation Agreements with other school districts. Obtaining the limitation is critical to the economic and competitive viability of this Project. Without the limitation approval, the Applicant would likely terminate the Project, including the aforementioned contracts, leases, and limited improvements, in order to reallocate resources in states with more favorable economics.

100% of the Project is anticipated to be located within Tahoka ISD

Tab Item 7

Description of Qualified Investment

Tahoka Wind, LLC plans to construct a 300 MW wind farm in Lynn County within the boundaries of Tahoka ISD consisting of 120 turbines.

The applicant is requesting an appraised value limitation on all of the qualified investment and the qualified property constructed or placed upon the real property within Tahoka ISD. For purposes of this application, the Project anticipates using General Electric (GE) 2.5 MW turbines. The qualified investment in Tahoka ISD is expected to include approximately one-hundred and twenty (120) GE 2.5 MW wind turbine generators, including 89m towers, nacelles, rotors with 127m rotor diameter, and reinforced concrete foundations, pads, underground and overhead electric collection cables, met towers, spare parts and control systems as necessary for the commercial generation of electricity. While the turbine locations have not yet been finalized, they are expected to be sited in a series of rows running approximately east to west in the Eastern part of Lynn County. The map in Tab 11 shows the preliminary turbine locations. The exact placement of these turbines, as well the exact specifications, heights, and component parts, is subject to ongoing planning, soil and geotechnical studies, and engineering and will be determined before construction commences.

In addition the wind turbines, the Project will also include an operations and maintenance building that will likely be located in the approximate center of the Project. It is also shown on the map in Tab 11. The Project will also require underground electrical collection cables, permanent meteorological towers, a Project collector substation, and an overhead transmission line connecting the Project collector substation to the Point of Interconnection. The proposed locations of the Project's collector substation and transmission line, as well as the location of the Point of Interconnection, are shown on the map in Tab 11.

The pre-construction activities did not result in the creation of any Qualified Property.

The pre-construction activities occurred on the following described lands with a map below.

Request For Waiver of Job Creation Requirement

March 9, 2017

Superintendent Dr. George McFarland
Tahoka Independent School District
2129 N Main St.
Tahoka, Texas 79373

Re: Chapter 313 Job Waiver Request

Dear Superintendent McFarland,

Please consider this letter to be Tahoka Wind, LLC's formal request to waive the minimum new job creation requirement, as provided under Texas Tax Code 313.025(f-1).

The governing body of a school district may waive the new jobs creation requirement in Section 313.021(2)(A)(iv)(b) or 313.051(b) and approve an application if the governing body makes a finding that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property that is described in this application. Wind energy projects create a large number of full-time jobs during the construction phase, but these jobs are temporary by nature. Once the project is in operation, a small crew of full-time employees will maintain and operate the facility. Based upon our experience in the wind industry, we expect that six (6) employees would be needed to operate a 300 MW facility, and we can commit to creating six (6) full-time positions to fill those needs. All would be qualifying jobs as described in Section 313.021(3) of the Texas Tax Code.

The applicant requests that the Tahoka ISD's Board of Trustees make such a finding and waive the job creation requirement. This waiver request is in line with industry standards for the job requirements for a wind energy facility of this size, as evidenced by limitation agreement applications that have been filed by other wind energy developers, and by documentation related to the development and operation of solar generation facilities.

The project stands to provide significant benefits to the community with respect to increased tax base and the ongoing royalty payments it will make to local landowners.

Sincerely,

Eric Barnett

Development Director
Tahoka Wind, LLC

* All investments made through the qualifying time period are captured and totaled on Schedule A1 [blue box] and incorporated into this schedule in the **first row**.

** Only investment made during deferrals of the start of the limitation (after the end of qualifying time period but before the start of the Value Limitation Period) should be included in the "year prior to start of value limitation period" row(s). If the limitation starts at the end of the qualifying time period or the qualifying time period overlaps the limitation, no investment should be included on this line.

*** If your qualifying time period will overlap your value limitation period, do not also include investment made during the qualifying time period in years 1 and/or 2 of the value limitation period, depending on the overlap. Only include investments/years that were~~not~~ captured on Schedule A1.

For All Columns: List amount invested each year, not cumulative totals. Only include investments in the remaining rows of Schedule A2 that were not captured on Schedule A1.

Column A: This represents the total dollar amount of planned investment in tangible personal property. Only include estimates of investment for "replacement" property if the property is specifically described in the application.

Only tangible personal property that is specifically described in the application can become qualified property.

Column B: The total dollar amount of planned investment each year in buildings or nonremovable component of buildings.

Column C: Dollar value of other investment that may affect economic impact and total value. Examples of other investment that will not become qualified property include investment meeting the definition of 313.021(1) but not creating a new improvement as defined by TAC 9.1051. This is proposed property that functionally replaces existing property; is used to maintain, refurbish, renovate, modify or upgrade existing property; or is affixed to existing property—described in SECTION 13, question #5 of the application.

Column D: Dollar value of other investment that may affect economic impact and total value. Examples of other investment that may result in qualified property are land or professional services.

GUIDELINES AND CRITERIA FOR GRANTING TAX ABATEMENTS IN REINVESTMENT ZONES

Lynn County, Texas

I. PURPOSE

Lynn County, hereinafter referred to as "County" is committed to the promotion of quality development in all parts of the County and to improving the quality of life for its citizens. In order to help meet these goals, the County will consider recommending tax phase-in, which includes the designation of reinvestment zones, application for tax abatements and entering into tax abatement agreements, to stimulate growth and development.

It is the intent of the County that such incentives will be provided in accord with the procedures and criteria outlined in this document. However, nothing in these Guidelines and Criteria shall imply or suggest to be construed to imply or suggest that tax entities are under any obligation to provide any incentives to any applicant. All such applicants for tax phase-in incentives shall be considered on an individual basis for both the qualification for tax abatement and the amount of any tax abatement. The adoption of these guidelines and criteria shall not create any property, contract or other legal right in any person to have the governing body consider or grant a specific application or request for tax abatement.

Only that increase in the fair market value of the property directly resultant from the development, redevelopment, and improvement specified in the contract will be eligible for abatement, and then only to the extent that such increase exceeds any reduction in the fair market value of the other property of the Applicant located within the jurisdiction creating the reinvestment zone. All abatement contracts will be for a term no longer than allowed by law. Additionally, the Lynn County Commissioners Court reserves the right to negotiate a tax abatement agreement in order to compete favorably with other communities.
