Tab Item 4

Detailed Description of the Project

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

2W Permian Solar, LLC is requesting a Chapter 313 Appraised Value Limitation Agreement from Andrews ISD for a proposed solar powered electric generating facility (the "Project") to be constructed in Andrews ISD in Andrews County. The installed capacity of the proposed project is expected to be approximately 420 megawatts (MW) of solar generation with an additional 40 megawatts of battery energy storage capacity. While solar panel type and size have yet to be finalized, the current plan is to utilize the following equipment:

- 745,470 modules of Jinko JKM400M-72HL-V (400W) and JKM405M-72HL-V (405W) panels; and
- 559,872 modules of JA – JAM72S09-390/PR (390W) and JAM72S09-395/PR (395W) panels.

Construction of the Project is expected to commence in the fourth quarter of 2019 and is anticipated to be complete in the second quarter of 2021. Construction of the project will include the following: solar modules/panels, metal mounting system with tracking capabilities, battery or battery system, underground conduit, communication cables, electric collection system wiring, combiner boxes, a project substation including breakers, a transformer, and meters, overhead transmission lines, inverter boxes on concrete pads, operations and maintenance facility, fencing for safety and security, telephone and internet communication system, access and service roads, and meteorological equipment to measure solar irradiation and weather conditions.

Tab Item 7

Description of Qualified Investment

2W Permian Solar, LLC plans to construct a 420 MW solar farm (the "Project") in Andrews County. The Project will include an additional 40 megawatts of battery energy storage capacity.

The Applicant is requesting an appraised value limitation on all the property constructed or placed upon the real property within Andrews ISD. This application covers all qualified property in the reinvestment zone and project boundary within Andrews ISD. Solar equipment selection is ongoing at this time and has not been finalized. The exact number of PV panels and their capacity will vary depending upon the panels and the inverters selected, manufacturer's availability and prices, ongoing engineering design optimization, and the final megawatt generating capacity of the Project when completed. With that being said, the current plan is to utilize the following equipment:

- 745,470 modules of Jinko JKM400M-72HL-V (400W) and JKM405M-72HL-V (405W) panels; and
- 559,872 modules of JA – JAM72S09-390/PR (390W) and JAM72S09-395/PR (395W) panels.

Construction of the project will include the following: solar modules/panels, metal mounting system with tracking capabilities, battery or battery systems underground conduit, communication cables, electric collection system wiring, combiner boxes, a project substation including breakers, a transformer, and meters, overhead transmission lines, inverter boxes on concrete pads, operations and maintenance facility, fencing for safety and security, telephone and internet communication system, access and service roads, and meteorological equipment to measure solar irradiation and weather conditions.

The Permian Battery Energy Storage System ("BESS") asset will be integrated into the solar energy generation Project and will be used, at certain times, to temporarily store electricity generated by the Project for the purpose of providing energy arbitrage and ancillary services for the ERCOT wholesale energy market, shifting the Project's energy production to delivery times and reliability services where the grid needs it most.

Construction of the project is anticipated to begin in quarter 4 of 2019 with completion and commercial operation by quarter 2 of 2021.
