Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller, as indicated on page 9 of this application, separating each section of the documents in addition to an electronic copy. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, and has determined that all assertions of confidentiality are appropriate, the Comptroller will publish all submitted non-confidential application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at comptroller.texas.gov/economy/local/ch313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

Detailed Description of the Project

In Tab 4, attach a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Overview Tesla Inc is evaluating the possible development, design, and construction of an electric vehicle manufacturing plant in Travis County within the Austin Green property. This site is approximately 2,100 acres and located at the intersection of SH-130 and Harold Green Road. The property is currently a sand and gravel mining site owned and operated by Martin Marietta and currently houses a fully operational concrete batch plant supporting the needs of numerous central Texas construction projects. The Martin Marietta assets will operate for a period of time but will be relocated in the future to allow for buildout of the site. The timeline for the relocation will be determined at a later date.

The construction is proposed to commence in Q3 of 2020 pending all required approvals.

Proposed improvements for which the tax limitation is sought would include the construction of a 4 -5 million square foot manufacturing plant. Construction timing is still to be determined but anticipated to cover the next 2-3 years. The construction would include the following scope of activities.

- 1) Civil work: Preparing the site with civil work that may be able to accommodate the placement of concrete foundations for main manufacturing buildings and equipment, including shops (listed below), operational support spaces, people support spaces and support structures including Central Utilities Buildings, Electrical Switchyards, Cooling Towers, Gas Pads, etc.,
- 2) Architectural: Steel erection and architectural build out for manufacturing and possible outbuildings.
- 3) Utilities: Main utility installation and/or connection to electrical transmission and distribution, domestic water, process water and wastewater treatment infrastructure.
- 4) Assembly: Purchase and installation of assembly line manufacturing equipment.

Documentation to assist in determining if limitation is a determining factor

Chapter 313.026(e) states "the applicant may submit information to the Comptroller that would provide a basis for an affirmative determination under Subsection (c){2}. " If you answered "yes" to any of the questions in Section 8, attach supporting information in Tab 5.

The worldwide automotive market, particularly for alternative fuel vehicles is highly competitive today and we expect it will become even more in the future. A significant and growing number of established and new manufactures have entered or are reported to have plans to enter the alternative fuel vehicle market. Tesla has been a leader with its electric vehicles and continues to expand its product offerings. In order to meet the global demand for its products, Tesla must continue to expand its global manufacturing capacity. Recent investments in Shanghai and Berlin will greatly increase our global production.

To continue to meet increased demand and to provide new products an additional manufacturing facility is required in the United States. Specifically, the output for this plant is targeted to provide vehicles to the eastern half of the United States so an ideal location is the central US. Numerous studies have been performed to identify the best location and eight states were initially identified as viable contenders for the new factory throughout the central part of the United States. In addition, many states and countries submitted unsolicited packages of incentives designed to entice Tesla to locate in their respective states. The current focus is on Oklahoma and Texas as potential locations for the new facility. The current potential location in Travis County in Del Valle School District was selected in Texas as it meets the project criteria.

However, for a project to succeed, it must also have an acceptable rate of return to secure the necessary capital and compete in the automobile industry against some very capable competitors that have been longstanding industry players. Therefore, local and state tax incentives serve a critical role in getting the project approved and operating successfully. This is especially critical in Texas due to the high level of real and personal property taxes relative to other states. Since school taxes are the largest component of local property taxes, the Section 313 tax limitation is especially critical to create a level playing field between Texas and other states vying for this project.. Therefore, obtaining the 313 limitation is a determining factor in the decision whether to locate the project in Texas.

RESOLUTION CREATING TESLA REINVESTMENT ZONE

WHEREAS, Section 312.0025 of the Texas Tax Code permits a school district to designate a reinvestment zone if that designation is reasonably likely to contribute to the expansion of primary employment in the reinvestment zone, or attract major investment in the reinvestment zone that would be a benefit to property in the reinvestment zone and to the school district and contribute to the economic development of the region of this state in which the school district is located; and,

WHEREAS, the Del Valle Independent School District (the “District”) desires to encourage the development of primary employment and to attract major investment in the District and contribute to the economic development of the region in which the school district is located; and,

WHEREAS, a public hearing is required by Chapter 312 of the Texas Tax Code prior to approval of a reinvestment zone; and,

WHEREAS, the District published notice of a public hearing regarding the possible designation of the area described in the attached **Exhibit A** as a reinvestment zone for the purposes of Chapter 313 of the Texas Tax Code; and,
