

Tab Item 7

Description of Qualified Investment

Armadillo Solar Center, LLC plans to construct a 200 MW solar farm (the “Project”) in Navarro County. This application covers all qualified property in the reinvestment zone and project boundary within Mildred ISD.

The Applicant is requesting an appraised value limitation on all the property constructed or placed upon the real property within Mildred ISD. Solar equipment selection is ongoing at this time and has not been finalized. The exact number of PV panels and their capacity will vary depending upon the panels and the inverters selected, manufacturer’s availability and prices, ongoing engineering design optimization, and the final megawatt generating capacity of the Project when completed.

Construction of the project will include the following: solar modules/panels, metal mounting system with tracking capabilities, battery or battery system (only stores power generated by qualified property), underground conduit, communication cables, electric collection system wiring, combiner boxes, DC-to-AC converter stations, a project substation including breakers, a transformer, and meters, overhead transmission lines, inverter boxes on concrete pads, operations and maintenance facility, fencing for safety and security, telephone and internet communication system, access and service roads, and meteorological equipment to measure solar radiation and weather conditions.

The collection system will be comprised of buried 34.5kV AC cabling system connecting the PV module DC - to AC inverter blocks to the project substation, the battery system, and the battery system to the project substation.

The battery or battery system associated with this project will only be used to store energy by the Qualified Property in this Application within Mildred ISD.
